

Hello Parents and Guardians!

Since 2014, Sweetwater1 has used the Raptor Visitor system to verify safe entry prior to allowing visitors into the building. Raptor recently released a more streamlined option for parents and guardians to use to expedite entry – For those who have been to some of our buildings recently, you may have seen or used an iPad to scan your license.

In addition to the iPad, Raptor has released the Raptor Safe app for parents that will create a “Raptor Passport” to streamline the visitor process. Once created, the “Raptor Passport” generates a QR code to scan from your phone to use for signing in and out of the building. In our trials, using the “Raptor Passport” takes about half the time as the traditional check in process while maintaining the same level of security to keep our kids safe!

We will be releasing this to a limited number of users to start, but hope to have this available for the majority of SCSD1 buildings in early 2026.

We've included an in-house guide on how to set up the Raptor Safe app:
