

# INCOMING 9<sup>th</sup> GRADE SUMMER MATH ACCELERATION REQUEST FORM (SMARF)

JOHN C. KIMBALL  
HIGH SCHOOL

## Enrollment Details

Incoming Kimball 9<sup>th</sup> grade students who wish to take a summer mathematics course for high school credit must submit this form **AND** required documentation **between March 2 and April 30, 2026**.

## Recommendation

The only recommended summer course option for mathematics acceleration is **Geometry**. This may be taken through an approved online school program only.

*The Kimball High School Math and Counseling departments do not recommend any other online courses for math acceleration. Algebra courses should be taken in person at Kimball to ensure that they have the appropriate rigor and provide curricular continuity to the advanced mathematics courses offered at Kimball.*

## Additional Information

- The course cannot be started until the student has completed 8<sup>th</sup> grade, and the 8<sup>th</sup> grade school year is over.
- All coursework must be completed and official transcripts must be received by Kimball High School by **no later than July 20, 2026**. (Some programs require a minimum of 30 days before they can be completed. It is up to the parent and student to plan accordingly so that transcripts will be received by KHS on time.)
- This completed form must be submitted to the link provided on the school website in PDF format only.
- All required paperwork must be submitted at one time.
- Student and parents understand that taking an online mathematics course will likely not provide sufficient foundation and preparation for the next level of math.
- Student and parents understand and agree that the student's math placement at Kimball is final and will not be changed, regardless of the grade the student is earning.
- Student and parents understand that taking less rigorous online math courses will be reflected in the student's future college application evaluations and recommendations.
- Completion of a summer math course does not guarantee a specific math course placement for 9<sup>th</sup> grade. Sections are filled by class order with seniors getting first priority.
