

FOOD SERVICE

The Board may provide for a food service program based on regular lunch service and including such other snack and breakfast programs as the needs of the students and the financial capacity of the district permit. The Superintendent or designee shall oversee the development of a written food safety program for each food preparation and serving facility in the district, as required by law. Foods and beverages will be stored, prepared and served in accordance with food safety regulations in order to prevent or reduce the risk of food-borne illness among students. The Superintendent or designee shall also develop rules and administrative regulations as needed to comply with state and federal regulations concerning the school food service program.

The School Board intends that, insofar as possible, the school food services program shall be self-supporting. The Board shall be provided with program financial reports regularly for inspection.
