Agricultural Technology

[Link to MVCTC Agriculture Info](#)

Agriculture is an instructional program that generally describes the principles and practices of agricultural research and production and may prepare individuals to apply such knowledge and skill to the solution of practical agricultural problems.

The program includes instruction in basic animal, plant, soil science and mechanization, animal husbandry, plant cultivation, soil conservation and mechanical technology. It also includes instruction in the processes, scientific principles and management decisions concerned with agricultural production of agriculture-related processing and storage techniques. Instruction may include an emphasis in aquaculture, hydroponics, food science and/or environmental science.

Multimedia Design Technology is a program that gives students a wide range of experience in the digital media and graphic design world. Students will have the opportunity to learn concepts from basic computer skills to advanced photography and video editing. Graphic design elements begin each students' learning experience and build throughout their three years in the program.

Veterinary Science

[Link to MVCTC Veterinary Science Info](#)

The Veterinary Science program prepares individuals to support veterinarians by providing assistance during animal examinations, treatment administration and monitoring; by keeping animal and related health record information; and by performing a range of selected practice-related duties. This program is designed to provide instruction in preparing the animal for examination and treatment, sterilizing equipment and performing selected routine laboratory procedures under direct supervision of the veterinarian.

All students who wish to attend the TOUR must complete this [Google Form](#).

More info will be emailed to them once the application portal opens on Wednesday, January 28, 2026!
