Private or School PHYSICAL EXAMINATION OF SCHOOL AGE STUDENT

PARENT / GUARDIAN / STUDENT:
Complete page one of this form before student's exam. Take completed form to appointment.

Student's name _____ Today's date_____

Date of birth _____ Age at time of exam_____ Gender: ☐ Male ☐ Female

Medicines and Allergies: Please list all prescription and over-the-counter medicines and supplements (herbal/nutritional) the student is currently taking:

_____

_____

Does the student have any allergies? ☐ No ☐ Yes (If yes, list specific allergy and reaction.)

☐ Medicines ☐ Pollens ☐ Food ☐ Stinging Insects

Complete the following section with a check mark in the YES or NO column; circle questions you do not know the answer to.

GENERAL HEALTH: ***Has the student…***	**YES**	**NO**
1. Any ongoing medical conditions? If so, please identify: ☐ Asthma ☐ Anemia ☐ Diabetes ☐ Infection Other_____		
2. Ever stayed more than one night in the hospital?		
3. Ever had surgery?		
4. Ever had a seizure?		
5. Had a history of being born without or is missing a kidney, an eye, a testicle (males), spleen, or any other organ?		
6. Ever become ill while exercising in the heat?		
7. Had frequent muscle cramps when exercising?		
HEAD/NECK/SPINE: ***Has the student…***	**YES**	**NO**
8. Had headaches with exercise?		
9. Ever had a head injury or concussion?		
10. Ever had a hit or blow to the head that caused confusion, prolonged headache, or memory problems?		
11. Ever had numbness, tingling, or weakness in his/her arms or legs after being hit or falling?		
12. Ever been unable to move arms or legs after being hit or falling?		
13. Noticed or been told he/she has a curved spine or scoliosis?		
14. Had any problem with his/her eyes (vision) or had a history of an eye injury?		
15. Been prescribed glasses or contact lenses?		
HEART/LUNGS: ***Has the student...***	**YES**	**NO**
16. Ever used an inhaler or taken asthma medicine?		
17. Ever had the doctor say he/she has a heart problem? If so, check all that apply: ☐ Heart murmur or heart infection ☐ High blood pressure ☐ Kawasaki disease ☐ High cholesterol ☐ Other:_____		
18. Been told by the doctor to have a heart test? (For example, ECG/EKG, echocardiogram)?		
19. Had a cough, wheeze, difficulty breathing, shortness of breath or felt lightheaded **DURING** or **AFTER** exercise?		
20. Had discomfort, pain, tightness or chest pressure during exercise?		
21. Felt his/her heart race or skip beats during exercise?		
BONE/JOINT: ***Has the student...***	**YES**	**NO**
22. Had a broken or fractured bone, stress fracture, or dislocated joint?		
23. Had an injury to a muscle, ligament, or tendon?		
24. Had an injury that required a brace, cast, crutches, or orthotics?		
25. Needed an x-ray, MRI, CT scan, injection, or physical therapy following an injury?		
26. Had joints that become painful, swollen, feel warm, or look red?		
SKIN: ***Has the student…***	**YES**	**NO**
27. Had any rashes, pressure sores, or other skin problems?		
28. Ever had herpes or a MRSA skin infection?		

GENITOURINARY: ***Has the student…***	**YES**	**NO**
29. Had groin pain or a painful bulge or hernia in the groin area?		
30. Had a history of urinary tract infections or bedwetting?		
31. **FEMALES ONLY:** Had a menstrual period? ☐ Yes ☐ No If yes: At what age was her first menstrual period? _____ How many periods has she had in the last 12 months? _____ Date of last period: _____		
DENTAL:	**YES**	**NO**
32. Has the student had any pain or problems with his/her gums or teeth?		
33. Name of student's dentist: _____ Last dental visit: ☐ less than 1 year ☐ 1-2 years ☐ greater than 2 years		
SOCIAL/LEARNING: ***Has the student…***	**YES**	**NO**
34. Been told he/she has a learning disability, intellectual or developmental disability, cognitive delay, ADD/ADHD, etc.?		
35. Been bullied or experienced bullying behavior?		
36. Experienced major grief, trauma, or other significant life event?		
37. Exhibited significant changes in behavior, social relationships, grades, eating or sleeping habits; withdrawn from family or friends?		
38. Been worried, sad, upset, or angry much of the time?		
39. Shown a general loss of energy, motivation, interest or enthusiasm?		
40. Had concerns about weight; been trying to gain or lose weight or received a recommendation to gain or lose weight?		
41. Used (or currently uses) tobacco, alcohol, or drugs?		
FAMILY HEALTH:	**YES**	**NO**
42. Is there a family history of the following? If so, check all that apply: ☐ Anemia/blood disorders ☐ Inherited disease/syndrome ☐ Asthma/lung problems ☐ Kidney problems ☐ Behavioral health issue ☐ Seizure disorder ☐ Diabetes ☐ Sickle cell trait or disease Other_____		
43. Is there a family history of any of the following heart-related problems? If so, check all that apply: ☐ Brugada syndrome ☐ QT syndrome ☐ Cardiomyopathy ☐ Marfan syndrome ☐ High blood pressure ☐ Ventricular tachycardia ☐ High cholesterol ☐ Other_____		
44. Has any family member had unexplained fainting, unexplained seizures, or experienced a near drowning?		
45. Has any family member / relative died of heart problems before age 50 or had an unexpected / unexplained sudden death before age 50 (includes drowning, unexplained car accidents, sudden infant death syndrome)?		
QUESTIONS OR CONCERNS	**YES**	**NO**
46. Are there any questions or concerns that the student, parent or guardian would like to discuss with the health care provider? (If yes, write them on page 4 of this form.)		

I hereby certify that to the best of my knowledge all of the information is true and complete. I give my consent for an exchange of health information between the school nurse and health care providers.

Hepatitis A (HepA)	1	2	3	4	5
Rotavirus	1	2	3	4	5
Other Vaccines: (Type and Date)					

 ADDITIONAL COMMENTS (PARENT / GUARDIAN / STUDENT / HEALTH CARE PROVIDER)
STUDENT NAME:

Pennsylvania
Department of Health

Type 1 Diabetes Information

This type 1 diabetes information was developed pursuant to the Pennsylvania School Code (24 P.S. § 1414.12) and is for school entities and nonpublic schools to provide to parents and guardians of incoming elementary school students and students entering grade six, beginning with the 2025-2026 School Year.

Type 1 diabetes in children is an autoimmune disease that can be fatal if untreated, and the guidance provided in this information sheet is intended to raise awareness about this disease.

Description

Type 1 diabetes usually develops in children and young adults but can occur at any age

- Type 1 diabetes can appear at any age, but it generally appears at two noticeable peaks. The first peak occurs in children between 4 and 7 years old. The second is in children between 10 and 14 years old (Mayo Clinic).

Type 1 diabetes affects insulin production

- Normally the body turns the carbohydrates in food into glucose (blood sugar), the basic fuel for the body's cells.
- The pancreas makes insulin, a hormone that moves glucose from the blood into the cells.
- In type 1 diabetes, the body's pancreas stops making insulin, and blood glucose levels rise.
- Over time, glucose can reach dangerously high levels in the blood, which is called hyperglycemia.
- Untreated hyperglycemia can result in diabetic ketoacidosis (DKA), which is a life-threatening complication of diabetes.

Risk Factors Associated with Type 1 Diabetes

It is recommended that children displaying warning signs and symptoms associated with type 1 diabetes described below, should be screened (tested) for the disease by their health care provider.

Risk Factors

Researchers do not completely understand why some people develop type 1 diabetes and others do not. However, having a family history of type 1 diabetes can increase the likelihood of developing type 1 diabetes. Other factors might play a role in developing type 1 diabetes, including environmental triggers such as viruses. Type 1 diabetes is not caused by diet or lifestyle choices.

Warning Signs and Symptoms Associated with Type 1 Diabetes and Diabetic Ketoacidosis

Warning signs and symptoms of type 1 diabetes in children develop quickly, in a few weeks or months, and can be severe. If your child displays the warning signs below, contact your child's

primary health care provider or pediatrician for a consultation to determine if screening your child for type 1 diabetes is appropriate:

- Increased thirst
- Increased urination, including bed-wetting after toilet training
- Increased hunger, even after eating
- Unexplained weight loss
- Feeling very tired
- Blurred vision
- Very dry skin
- Slow healing of sores or cuts
- Moodiness, restlessness, irritability, or behavior changes

DKA is a complication of untreated type 1 diabetes. DKA is a medical emergency. Symptoms include:

- Fruity breath
- Dry/flushed skin
- Nausea
- Vomiting
- Stomach pains
- Trouble breathing
- Confusion

Type 1 Diabetes Treatments

There are no known ways to prevent type 1 diabetes. Once type 1 diabetes develops, medication is the only treatment. If your child is diagnosed with type 1 diabetes, their health care provider will be able to help develop a treatment plan. Your child's health care provider may refer your child to an endocrinologist, a doctor specializing in the endocrine system and its disorders, such as diabetes.

Contact your child's school nurse, school administrator, or health care provider if you have questions.
