

Clayton County Public Schools & Artificial Intelligence FAQ

Frequently Asked Questions

Question or Scenario	Solution
Will artificial intelligence replace my child's teacher?	No. CCPS has explicitly stated that AI is a tool designed to support people, not replace them. The district operates under a commitment to "human oversight," ensuring that teachers and staff remain in charge of the classroom. While AI may assist with tasks like lesson planning or analyzing data, humans will always make the final decisions regarding student grades and discipline.
How is the district protecting my child's private information?	The district enforces strict privacy standards to protect student data. CCPS complies with federal laws, including the Family Educational Rights and Privacy Act (FERPA) and the Children's Online Privacy Protection Act (COPPA), particularly for students under age 13. The district promises never to put private information—such as social security numbers, home addresses, or health details—into AI systems. Furthermore, students are restricted to using only district-approved, age-appropriate AI applications.
What constitutes "cheating" versus "learning" when using AI?	CCPS has outlined clear examples of "Okay" and "Not Okay" uses to guide families. It's important to remember that AI is here to help—not to replace your own thinking—so all submitted work must be the student's own. • Okay Uses: When permitted by the instructor, using AI for creative support (like generating an image for a project), translating languages to understand assignments, or receiving immediate feedback on work are okay uses. • Not Okay Uses: Using AI to write assignments entirely for the student, using study companions to scan and solve math problems without doing the work, or engaging in any activity that bypasses the learning process. Submitting AI-generated work as your own is never allowed.
When will parents and students receive training on AI?	Students: AI literacy lessons will be Media Specialist-led and / or added to the school's Digital Citizenship Canvas courses for

	completeion between February 12 and April 3, 2026. Parents/Community: a School-based AI Parent Info Meeting is scheduled anytime between February to April 2026. Please inquire with your school officials. Additionally, the CCPS Parent and Community AI Literacy Canvas Course will be available starting February 2026.
Don't see your question?	Please complete THIS FORM and a response will be emailed within 5-10 business day. Frequently submitted inquires will be added to this FAQ doc.
