NAF HEALTH SCIENCES ACADEMY

The NAF Academy of Health Sciences introduces students to the world of healthcare through a blend of science-based coursework and hands-on learning. Students explore subjects like Global Health, Medical Careers, Anatomy & Physiology, and Biotechnology, helping them understand how the healthcare system works and what different medical professions do. The program emphasizes career-connected learning, including experiences such as clinical exposure, hospital visits, simulations, mentorship, and internships, all designed to build real-world skills and prepare students for college and health-related careers.
