

WALKERS AND RIDERS

Students in grades K-5 qualify for transportation if they live 1 or more miles from their neighborhood or assigned* school(s).

Students in grades 6-8 qualify for transportation if they live 1.5 or more miles from their neighborhood or assigned* school(s).

Transportation requests must be made annually by families. To secure start-of-school-year transportation for returning students, requests must be made by August 15th. Following a request, families will be contacted prior to the start of the school year to confirm eligibility and to provide bus routes and approximate pickup/dropoff times to eligible students. Eligible students new to the district, or eligible students whose needs change during the school year, may arrange for transportation throughout the school year.

Students on IEPs may have specialized transportation requirements which are not addressed by this policy. The accommodations made for transportation for a student on an IEP will take precedence, and will adhere to state regulations.

*Note that students are not eligible for transportation for school assignments that come as a result of in-district transfer requests.
