

The **Indoor Air Quality Initiative** is a program dedicated to cleaning the air in Connecticut schools.

### How does the program work?

Thanks to state funding, this initiative aims to improve indoor air quality with DIY air purifiers. All you have to do is apply [here](#).

Our team will work with you to align program implementation with your schools' priorities.

All materials (box fans, filters, duct tape) will be delivered to your school. Plus, you'll have access to simple instructions and how-to-build videos.

### Want more?

If interested, each school can receive:

- Five air quality monitors and access to real-time data
- NGSS-aligned resources to make the build a learning experience
