

# PROTECT YOUR HEALTH WITH EARLIER DETECTION

Thank you for choosing SimonMed for your mammogram. We're committed to bringing you the latest technology to help you take control of your health. We actively seek out innovations—like advanced artificial intelligence— that can help spot cancer and your risk of disease earlier. *These services are paid at the time of screening by the patient. We accept HSA, debit or credit card. The health plan, employer, school district, non-profit organization, etc. are NOT billed for this service.*

Take a moment to review your options below, then complete the form and hand it to the front desk.

## Mammogram+

Our Most Advanced Breast Cancer Detection System – Recommended by our doctors

Includes two advanced AI tools to help spot cancer even earlier

Personalized Breast Health Report with an action plan

Faster results

Available today during your exam — no extra appointment time needed

Yes, I'd like to add Mammogram+ – \$50

## Mammogram+ Heart

One Exam. Two Life-Saving Insights.

Recommended by our doctors to detect early heart disease risk—the leading cause of death in women. Preventable and treatable when caught early.

Everything in Mammogram+

Adds a third AI tool to look for Breast Arterial Calcification (BAC), a marker of your heart disease risk  
Personalized Heart Health Report with an action plan

Available today during your exam — no extra appointment time needed

Yes, I'd like to add Mammogram+ Heart – \$90

I have questions about the benefits and will speak with my technologist.

I understand the benefits, but I am choosing not to add these options today.

## Why consider adding advanced technology? Here's what our doctors say:

Some signs of cancer can be subtle, sometimes smaller than a pea, which makes them difficult to detect with the human eye alone, especially in dense breast tissue, which is very common. Our advanced AI acts like a second (or third!) expert opinion. It's been proven to help spot important findings earlier.

Ultimately, it's about giving you the choice to have the best available technology and the greatest peace of mind.
