

WHAT CAN OUR CLASSROOM TEMPERATURE TELL US?

THERMO-TRACKER

WHAT DOES THE WAY WE USE HEATING AND COOLING ENERGY REVEAL ABOUT OUR SCHOOL?

What does the way we use energy (heating and cooling) reveal about our school? Energy is a valuable resource. Every temperature change—up or down—can add up. By tracking temperatures and actions, you can learn how small changes make our school more comfortable and save energy.

WHAT YOU'LL NEED:

Log sheet or piece of paper

Pen or Pencil

Phone or calculator

STEP-BY-STEP INSTRUCTIONS:

- 1 Pick a Classroom or Space.** Choose the room you want to monitor.
- 2 Record the Temperature.** Write down the temperature at the same time each day. (Pro tip: track morning and afternoon temperatures!)
- 3 Try Energy Actions.** Adjust blinds, close doors, turn off lights, or adjust your thermostat (with teacher permission).
- 4 Track Changes.** Note how the temperature changes after your actions.

ACTIONS TO TEST:

- Close or open windows and doors
- Adjust blinds or curtains
- Turn off unused lights or electronics
- Move furniture away from heaters or vents
- Use fans instead of lowering or raising the temperature
