Preschool Inclusion Update

For the 2026–2027 school year, Pequannock will be transitioning two existing preschool disabilities classrooms into integrated preschool classrooms which will educate children with and without disabilities together. The integrated model promotes inclusion, peer modeling, and differentiated instruction while supporting students’ academic, social, and emotional development. Through thoughtful planning, collaboration, and family communication, this approach aims to provide high-quality early learning experiences that meet the diverse needs of all preschool learners.
