## Sound Slide Cards

### Compound Words

Step 1. Cut out the picture cards and the blue rectangles. The rectangles will be your sound tiles.

Step 2. Place the two tiles in the top rectangle directly below the picture. Each sound tile represents a syllable in the word.

Step 3. Say the compound word.

Step 4. Have your child place their finger on the first blue tile and slide the sound tile down to the box below while saying the first syllable.

Step 5. Have your child place their finger on the second blue tile and slide the sound tile down to the box below while saying the second syllable.

Step 6. Now that your child has said the individual syllables in the word, it is time to blend the word back together. Have your child place their finger at the bottom of the card and slide left to right while blending the two syllables together and saying the word.
