TECHTEACH

TEXAS TECH
College of Education

FOUR-YEAR PROGRAM

TechTeach is a unique, clinically intensive, competency-based program designed to prepare effective teachers who will improve the academic achievement of K-12 students. It is among the first in the nation to combine intense clinical experiences with opportunities to dramatically improve effective teaching behaviors in order to impact student learning. The four year program is fall start only.

What makes TechTeach unique?

- Students are supported by a site coordinator who coaches and refines. Candidates graduate with skills of a 3rd or 4th year teacher.
- Students use state of the art technology to capture, evaluate, and improve teaching methods.
- Students work alongside experienced mentor teachers, dedicated to the professional growth of their teacher candidate for a full year.

Department of Teacher Education

FAST TRACK PROGRAM

TechTeach Across Texas helps individuals who already have an Associate of Arts in Teaching degree become a premier certified teacher and obtain a bachelor's degree from Texas Tech University in just one year. Fast track is a summer start only program.

What makes TechTeach Across Texas unique?

- Students take online courses and complete clinical experiences in your local community. At present we have district-based partnerships across the state of Texas and are always building new relationships with additional partners.
- The fast track program is modeled after TechTeach standards; students receive one-on-one classroom coaching, intense clinical experiences, and rigorous academic preparation.
