Information about this interim

Metric information

This data tracks the ratio of the suspension rates for Black students to the suspension rate for the entire student population. In other words, this shows how much more or less likely Black students are to be suspended in relation to the total student population.

Why it matters

Students acting out and being suspended from school is often an indicator that they have unmet emotional health and wellness needs. In addition to taking away valuable instructional time, suspensions may also increase dropout rates and increase risks of further disciplinary referrals and involvement in the criminal justice system.
