Attachment Summary 5

2025-2026 Phase two: District Trauma-Informed Approach Plan

Operational Definitions

While there are a number of different definitions and measures for what it means to be a trauma-informed school, the Kentucky Department of Education's will use the term trauma-informed as the goal for schools and recognize being trauma-informed as encompassing aspects of trauma awareness, trauma sensitivity and trauma responsiveness.

Strategy: An approach to systematically address the process, practice, or condition that the district will focus its efforts upon in order to address the required statutory components outlined above. There can be multiple strategies for each component.

Data used to document/monitor implementation: Appropriate data that shows how well the district is addressing the required component of the plan as well as progress monitoring. The measures may be quantitative or qualitative but are observable in some way. Examples may include student survey data, pre-/post- questionnaires to assess enhanced trauma awareness, school climate assessment results, discipline data, etc. For progress monitoring, the district should use a process to assess the implementation of the plan, the rate of improvement, and the effectiveness of the plan. The description should include the artifacts to be reviewed, specific timelines, and responsible individuals.

Resources and partners used: Local, state, or federal funds/grants used to support (or needed to support) the implementation. In addition, districts and schools may partner with community agencies and local experts to help address key components of the trauma-informed plan.

Timeline: This identified the timeframe in which the strategy or practice will be implemented. The timeline should take into account whether it is flexible enough to accommodate changes and should be reviewed and updated regularly.

Roles or committee(s) responsible: The individual or group identified to implement the specific strategy/practice to address the requirement component. This could include some or all members of a trauma-informed team, as outlined in KRS 158.4416. Additionally, it could include members of the School Safety and Threat Assessment Teams (KRS 158.4412) or other existing multi-disciplinary teams within the district.

Using the Trauma-Informed Approach Plan Template

The template is designed to ensure all statutory components are addressed in the district plan by identifying appropriate strategies/practices, data, resources, timelines, and responsible individuals or groups to effectively implement the plan.
