New Year New ISSUE!

Diman's Year in Review:

While Technology is always looking ahead and what our district has on the horizon is very exciting, as we move into the new Calendar year and through the halfway point in the school year, we'd like to briefly review our year so far:

- Information Technoogy is now **Technology Services** – New name, same dedication to service for our educators!
- **Server Migration Completed** – Diman's Network has been rebuilt from the ground up and is now ready to be moved onto new infrastructure hardware
- **LaunchPad** is our new Start Page – All Staff and Students utilize this to access apps and resources available to them
- We launched **ParentSquare** to overwhelming success and positivity from our community – we're seeing 100% parent engagement through the app!
- All substitutes have been provided email accounts in the **@substitute.dimanregional.org** domain – More info [here](#).

Technology Move

BRACE YOURSELF

Everyone is working very hard on managing the upcoming move to our new space. While this is a moving target and a lot of logistics are still being worked out, in terms of technology being moved the expectation is:

- **All Staff take their Laptop devices home over the summer to bring into the new building in the Fall**
- If you are a **faculty member that is not returning in Fall**, please leave your device with Mrs. DeMoura in the Media Center on the last day of school
- Tech Services will be meeting with the Assistant Principal of Technical Affairs and working with Vocational Department Heads to define shop logistics
- Tech Services will handle peripherals in Academic Classrooms (Keyboards/Mice, Docking Station, Monitor) after the last day of school

Thank you all for your patience as we work together to get everything packed and unpacked into our new space!

Diman Digitization Project

Speaking of moving, we are actively working to digitize historical documents and data important to Diman, in an effort not only to preserve our history, but reduce the amount of physical material needing to be moved, as well as sharing this material with our teachers, students and the community.

Viewable [here](#), the Archive contains the materials we have already been able to digitize. The amount of content available should increase over the next few months, as ITS works with students and other stakeholders to get this content digitized and uploaded.
