MATH SCHEDULING INFORMATION

Students need at least 3 years of math to graduate, but many take more. You must take Algebra 1 (or Intensified Algebra), Geometry, and Algebra 2 (or an alternative.) If you are considering taking an alternative to Algebra 2, please talk to your counselor and/or a math teacher because this decision will impact your post-high school options.

Course you are currently in	**Courses you can take next**
Algebra 1 OR Intensified Algebra	Geometry *OR* Geometry and Algebra 2 (This option is for students with strong math skills who want to take more math in the future. Talk to your math teacher if you are interested in this.)
Geometry	Algebra 2* Algebra 2 + Precalculus (this is a double-blocked course for strong math students who want to accelerate in math) *If you don't want to take Algebra 2, or don't think it is a good fit, talk to your math teacher and counselor. There are some other options, but they will impact your options after high school.
Algebra 2	Precalculus Math in Society AP Statistics
Math in Society	Algebra 2
Precalculus OR Algebra 2 + Precalculus	AP Calculus Calculus AP Statistics
AP Calculus	AP Statistics Running Start
AP Statistics	Calculus (if you have already taken precalculus) AP Calculus (if you have already taken precalculus) Running Start Precalculus

Ask the nearest math teacher if you have questions!
