

Muenster ISD
Student Health Advisory Council
Meeting Minutes - Tuesday, January 6, 2026

- Meeting Called to Order @ 09:03 am.
- Sign-In / Welcome - Members present as follows:

<u>Staff:</u> Brandi Richardson Dr. John Underwood Misty Rhyne Jackie Reynolds	<u>Parents/ Community:</u> DJ Yarbrough Holly Harris-Bayer
--	--
- Approve minutes from the previous meeting on October 20, 2025 - Misty Rhyne made a motion to approve the minutes. Jackie Reynolds seconded the motion. Minutes approved.
- Annual Report of Immunization Status - Nurse Richardson reported that the 2025–2026 Annual Immunization Status Report has been completed and submitted. All students have either current immunization records or an exemption affidavit on file, and Muenster ISD had no students out of compliance at the time of reporting.
- Glucagon/ LifeVac training for staff - Nurse Richardson reported that elementary staff are being trained in the administration of Glucagon and the use of the LifeVac airway clearance device during staff inservice days prior to the start of the spring semester. Some staff were trained on Monday, January 5, 2026, and the remaining staff will complete training later today.
- Counselor updates - Mrs. Rhyne reported that Abigail's Arms will present to elementary students in grades PK–6 once more during the spring semester, with dates to be determined. Elementary bullying lessons were completed during the first semester. Mrs. Reynolds reported that student education mandates under Tucker's Law for fentanyl awareness are ongoing and being met through Vector Solutions, an online training platform. Mrs. Rhyne added that Vector Solutions will also be used to meet required mandates for 6th-grade students on the elementary campus during the spring semester.
- Student Nutrition - The council discussed potential solutions for providing higher-protein snacks and meals to students at MISD, while remaining compliant with the Texas School Nutrition Policy regarding Smart Snacks and Competitive Sales. Nurse Richardson reported that the school cafeteria is currently doing a good job of offering higher-protein meal options, particularly during breakfast. The council suggested exploring additional higher-protein options—such as Greek yogurt, smoothies, protein shakes, hard-boiled eggs, and breakfast burritos—provided these items meet federal Smart Snacks requirements. The council will continue discussions with MISD administrators to determine whether offering these additional options is compliant with the Texas School Nutrition Policy.
- Open Forum/ Discussion -
 - A question was raised regarding whether drunk driving education will be provided to high school students this school year. Mrs. Reynolds responded that she is actively seeking a program or presentation to address the topic.
 - Nurse Richardson reminded the council that Muenster Memorial Hospital has offered funding to cover the cost of fentanyl education for students, made possible through state grant funding.
 - A question was also raised regarding MISD's continued participation in the Guardian Program and the potential for hiring a full-time school resource officer (SRO). Dr. Underwood confirmed that MISD continues to have guardians on both campuses. The council also discussed the logistics of conducting active shooter scenario training with MISD staff.
- Future meetings:
 - February 23, 2026
 - April 13, 2026
- Adjourn - Meeting was adjourned @ 09:32 am.
