General Comments

Current inspection:

External thermometer readout was 35F, while internal auxillary thermometer was reading 30F.

The freezer had 2 internal thermometers, so one was brought into the refridgerator to gauge the accuracy of the internal thermometer which looks to have been older. The temperature read closer to the the external dislay thermometer. Determined with the Food Manager that th thermometer wa not accurate and needed to be replaced. Food temperatures were checked to see that walk-in cooler was keeping temperature. Food temperature in the upper range and thermistat was adjusted to cool to lower temperature to avoid food rising above 41F.

Last inspection:

Walkin cooler at 32F

Walk- in Freezer @0

Thermometer calibration logs done daily

Temperature logs on cooling units checked daily

cook to logs maintained daily for all

auxillary thermometers present in cooling units

3rd compartment sink using chlorine as sanitizer and is at sufficient level to sanitize

Male employee has been here all school year- Dan Raffield. - has food handlers certificate.

Mary Thomas has serve safe food manager certificate displayed and is Food manager onsite at time of inspection and food service time.
