

February 11, 2026

Dear Parents/Guardians,

I'm writing today to inform you of a pilot we are launching with [MagicSchool](#)—an educator-built AI platform designed to give every student a more personalized, engaging learning experience. Your child is among those in sixth through 12th grade selected to participate.

What MagicSchool does:

MagicSchool is a platform that uses Artificial Intelligence (AI) to make learning more fun and personalized for your child.

- Personalized support: Suggests age-appropriate prompts and resources so each child can learn at the right pace.
- Teacher support: Handles routine planning and grading tasks, freeing teachers to focus on meaningful, human-first moments with your child.
- Built-in safety: Developed by former educators, MagicSchool meets strict privacy standards and never uses student data to train public models.

Using AI ethically:

We want to make sure everyone understands how to use AI in a safe and thoughtful way. Just like we teach good behavior in the classroom, it's important to treat AI with respect. We'll discuss with the students how to use MagicSchool responsibly and to appreciate the assistance it provides.

Safety with AI:

Your child's safety is a top priority. MagicSchool is designed with [safety measures in place](#). Our teachers will guide all students on how to use AI responsibly, and introduce them to AI literacy best practices.

What can you do to support?

As parents/guardians, your involvement is crucial. Talk to your child about their experiences with MagicSchool. Ask them what they're learning and how it is helping them. If your child has any questions or concerns, encourage them to share with us.

Next Steps:

We'll be having a special session to introduce MagicSchool to the students, explaining what AI is, how to use it responsibly, and ensuring they understand the safety measures in place. If you have any specific questions or would like more information, please don't hesitate to reach out to CSD Supervisor of Instructional Technology [Tami Flood](#).

We're excited to embark on this AI-powered learning journey with your child, and we know it will add a touch of magic to their educational experience!

Sincerely,

Dr. Brian W. Scriven
Superintendent of Schools
