Magic Design

AI-Powered Design

Design anything with a prompt, right inside the editor

Now there’s a faster way to start designing across Canva. You can turn a simple prompt into a complete, editable draft in seconds from right inside the editor. From pitch decks to polished social content, docs to websites, it reimagines how every idea begins — replacing blank-page dread with direction, confidence, and momentum.

Use case	During planning time, a teacher types “presentation on Lincoln and the Civil War.” Canva generates a complete first draft so you can spend their time refining, not starting from scratch.

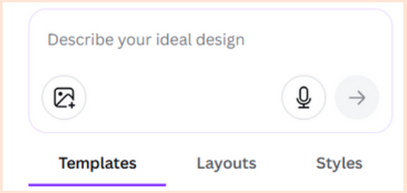

Create Powerful Presentations with Magic Design

1 Create a new presentation

From the homepage, create a new presentation or **tap here** to open a blank presentation.

2 Let Magic Design do the work

Select the **Design** tab, and type your lesson prompt in the search bar. Click Generate design. Watch as Magic Design instantly creates presentations from a prompt.

3 Apply your design

Select your favorite and tap **Apply all pages**, review the content and make any changes.

Take a moment to Conjure up something, ANYTHING with Magic Design! ✨

🎨

Next Steps... How will you use Magic Design in your job role? Be prepared to share your Design during Part II of this session.

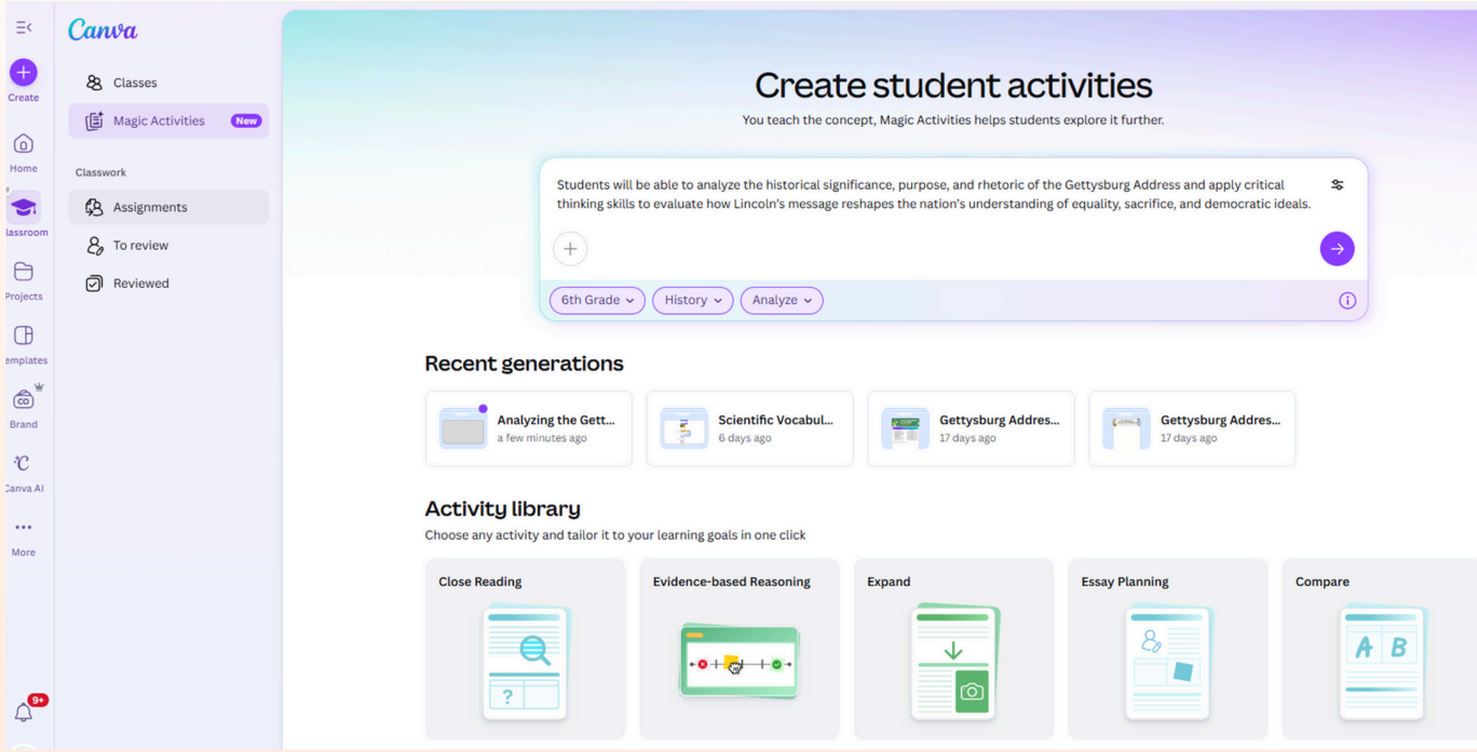

Magic Activities

Magic Activities

Activities that inspire, created in seconds.

Skip the hours spent designing classroom materials. With Magic Activities, you can instantly transform any learning objective into an engaging and visual learning experiences with the power of AI. Simply enter a prompt to create beautiful, inquiry-based exercises that turn passive knowledge into active exploration.

Use case

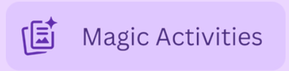

Teachers can create student-ready activities in seconds, tailored by grade, subject, and learning objective. AI does the groundwork so teachers can focus on teaching, not templating.

bit.ly/getty1863

Create an engaging learning experiences with Magic Activities.

1 From Classwork click on Magic Activities

Head over to your **Classroom** tab and select **Magic Activities** to get started.

2 Prompt like a pro

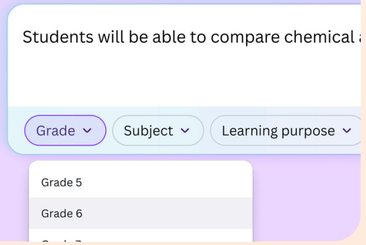

Write a prompt that follows this formula to create an activity:

Student will be able to... | learning verb | specific topic/goal

Example:Students will be able to analyze the historical significance, purpose, and rhetoric of the Gettysburg Address and apply critical thinking skills to evaluate how Lincoln's message reshapes the nation's understanding of equality, sacrifice, and democratic ideals.

3 Apply filters and generate

Add filters by specifying the **grade** and **subject** (**learning purpose** is optional), then click the purple arrow to generate your Magic Activities.

4 Select your activities

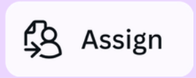

Now it's time to choose the activities you'd like to **generate** and **refine**. Check out the thumbnails and descriptions to find the perfect match for your learning needs, or tap the arrow to explore more options.

5 *Optional:* Personalise and perfect

Once your activity is ready, it will appear under **'Recent Generation.'** Just click to open and tailor it for your students. Ensure it aligns with your learning goals, and edit it like any Canva design.

6 Assign to students

Your Magic Activity is all set! Just tap "**Assign**" in the top right to automatically create an activity for each student. Share it with your students via a link or assign it to a class. Once completed, you'll find it in **Classwork**.

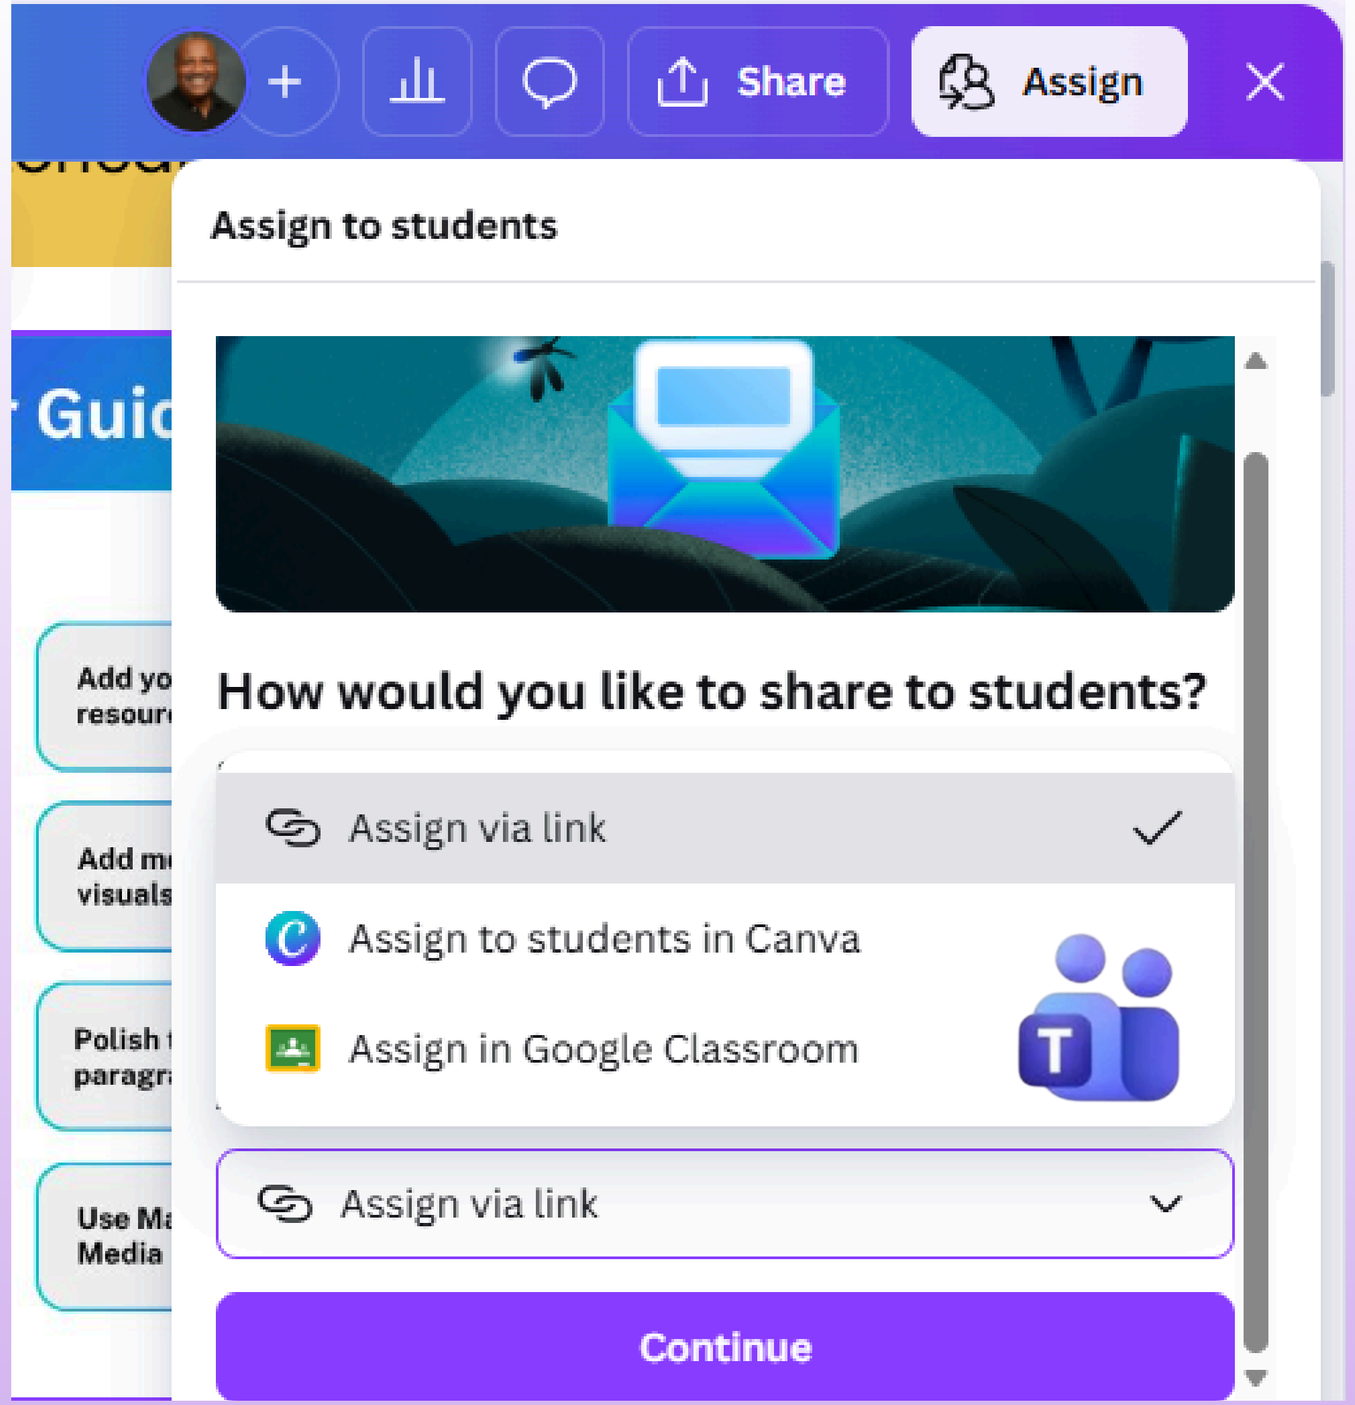

bit.ly/getty1863

Assign flow

Assignments, now smoother and smarter.

Top marks for teaching efficiency. Smarter workflows mean each student gets their own copy of the assignment, progress is visible in real time, and feedback fits naturally into the lesson. With seamless connections to the platforms teachers already use, assignments now run smoother than ever.

Use case	A science teacher assigns an activity for each student to complete. Students open it directly from their LMS, complete their work, and submit it back in one click. The teacher reviews and grades everything in one place, with no juggling tabs or missing files.

Next Steps... How will you use Magic Activities in your job role? Be prepared to share your Design during Part II of this session.

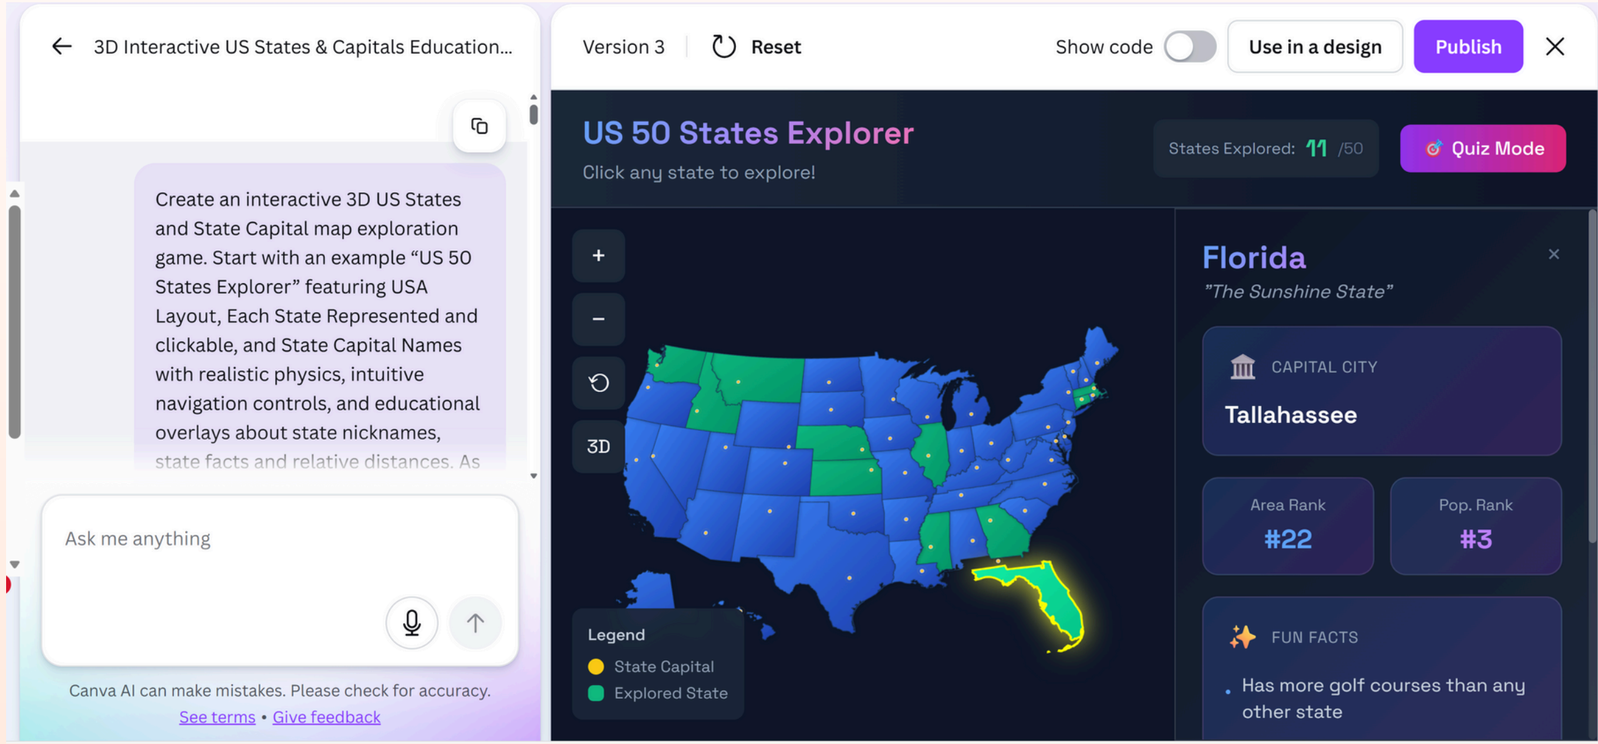

Canva Code

Canva Code 2.0

Build with Canva Code

Turn ideas into interactive experiences and capture the responses with ease. Whip up an interactive website or tool, customize colors and fonts to suit your style, and publish in an instant. Then capture every response directly in a connected Canva Sheet, ready to share, analyze, or build on, all without leaving Canva. Skip the complexity and crack the code to creative possibilities.

Use case

With Canva Code, student responses from activities are saved directly to a Canva Sheet. Teachers can quickly review results, spot common errors, and use the insights to guide instruction, no extra grading needed.

1

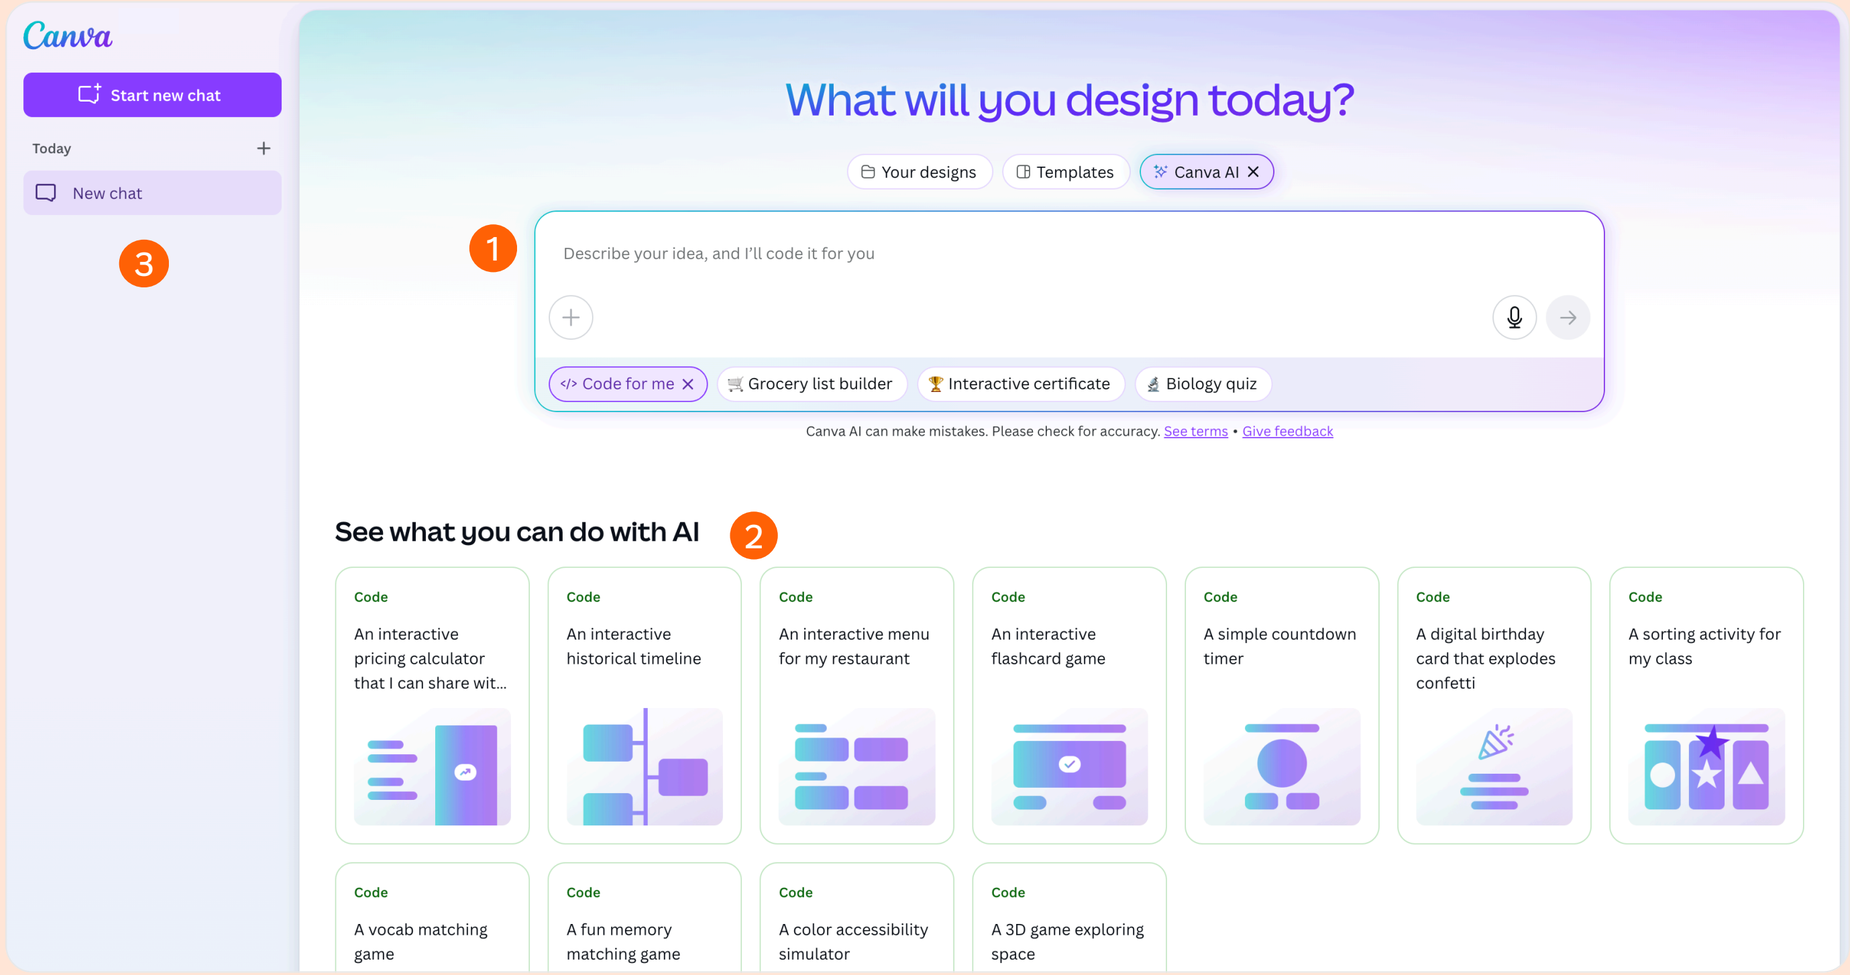

Type your prompt here.

2

Explore our ready-made prompts to see what's possible with Canva Code.

3

All your chats are saved here. You can return to them anytime to review or update.
