

SURVEY RESULTS

What happens with the information collected?

The Georgia Special Education Parent Survey helps to determine parents' perception of the success of family engagement between the local school and themselves.

The data collected is a part of the State Performance Plan/Annual Performance Report and is reported on the school district's profile and assists with identifying needs in family involvement within the state and local school districts. Each state is required to conduct a parent survey collection process to measure parent/family needs and perceptions.

The information gathered is a component of the State Performance Plan, **Indicators 8: Percent of parents with students receiving special education services who report that schools facilitated parent involvement as a means of improving results for children with disabilities.**
