TESTING PREPARATION TIPS FOR FAMILIES

Teens feel a lot of pressure about their future and college. They need to know one test won't define them.

BE THE "SAFE SPACE"

Make sure home is a place where they don't only have to talk about school. Talk about hobbies, movies, or sports too.

PRIORITIZE SLEEP

Remind them that a rested brain remembers more than a tired brain.

**PROUD
OF YOU**

FOCUS ON EFFORT

Instead of saying "I hope you get an A," say "I'm proud of how hard you've been working."

WATCH FOR STRESS

If they are stopping their usual hobbies or acting very differently, it's time to step in and encourage a reset.

FOCUSING ON THE BIG PICTURE: BALANCED SUPPORT FOR TESTING SEASON.

TESTING ACCOMMODATIONS

What Parents Need To Know...

PARENTS SHOULD KNOW

- Student accommodations are listed in their IEP/504 plan
- Accommodations provide access, not advantage
- Supports should be used regularly in class, not only for testing
- Accommodations must be provided exactly as written

COMMON TESTING ACCOMMODATIONS

- Extended Time
- Small groups or alternate setting
- Breaks as needed
- Read-aloud or directions clarified
- Assistive technology or specialized materials
- Additional supports may vary by student

HOW PARENTS CAN HELP

- Talk with your student about their accommodations
- Encourage your child to speak up to ensure their success
- Make sure they are rested, well nourished and have a calm start on testing days
- Remind them that accommodations are nothing to be embarrassed about

KEY REMINDERS

- If an accommodation is not provided on the day of testing, notify the ESE Specialist or Testing Coordinator
- Changes to accommodations require an IEP or 504 team meeting
- Questions are best addressed well before testing begins

Accommodations level the playing field for students with disabilities - they help your child show what they know

BOOST YOUR STUDENT'S FOCUS WITH INNER EXPLORER!

Testing season can be stressful, but your child's school has a way to approach this: Inner Explorer. This program uses short transitions, sound, or 5–10 minute daily mindfulness practices to help students "reset" their brains, moving from stress to focus.

You can support your student at home by downloading the Inner Explorer HOME app. Practicing together for just a few minutes a day helps your child stay calm, manage "test jitters," and perform their best.
