- ❑ Career & Technical Education (CTE)

# COLLEGE CREDIT PLUS (CCP)

College Credit Plus (CCP) is Ohio's dual enrollment program that allows students in grades 7 through 12 to earn both high school and college credits by taking courses from Ohio colleges or universities

Most students begin taking CCP courses as juniors.

We encourage students to take honors and AP courses before pursuing CCP

# How to participate in CCP courses?

To participate in Ohio's College Credit Plus (CCP) program, students must:

1. Submit Required Forms
  - a. Complete and submit the Intent to Participate form
  - b. Complete the upcoming school year CCP Contract
  - c. Intent and Contract must be completed EVERY year
2. Submit both forms to your School Counselor
3. Apply to a College
  - a. Students must apply directly to the college offering CCP courses.
  - b. Each college has its own application process and requirements.
4. Course Planning
  - a. Inform your School Counselor of the CCP courses you plan to take to ensure the courses count toward high school graduation.

**ALL STEPS MUST BE COMPLETED BY APRIL 1st,**

## 2026-2027 Course Selection and Scheduling Information

There are many factors that influence course selection for high school. These include previous academic performance, teacher and counselor recommendations, college and career readiness, and progress towards graduation.

Parent and student input are very important in this process. Parents - please talk to your students about their academic and social goals and your goals for them.

The **Course Planning Guide** includes descriptions of the courses that will be offered in 2026-27, course sequencing, and graduation requirements.

Make an appointment (via email) with your assigned School Counselor to discuss scheduling.

# HEIGHTS PROGRAM PLANNING GUIDE

# HEIGHTS PROGRAM PLANNING GUIDE: COURSE DESCRIPTION

## Geometry & Geometry Honors

This course is a study of plane and solid geometry. It includes precise definitions, theorems, and postulates relating to plane and solid figures. Algebra concepts are integrated throughout the course. Students will perform constructions, transformations and investigations as they study topics such as congruence and similarity; properties of lines, triangles, quadrilaterals, and circles; area; volumes; coordinate geometry; and basic right triangle trigonometry. Additional topics include various methods and types of proofs, coordinate geometry and networks. This course sharpens thinking skills by teaching the process of logical reasoning and deductive thinking. The purpose of geometry is to prepare students to be able to utilize geometric concepts in the real world and in future studies. A **scientific calculator is required; model TI-30xiis is recommended.**
