The Fletcher School Overview

Mission

The Fletcher School empowers students with learning differences to achieve bright futures by offering an individualized, multisensory, college preparatory curriculum that prepares them to reach their full potential.

Unlocking Extraordinary Futures

Established in 1982, The Fletcher School unlocks extraordinary futures one student at a time. Our bright, talented, and often gifted students learn in small, structured classes with an average 6:1 student-to-teacher ratio. Each student has an individual and prescriptive learning plan developed for them.

Applicants are considered for admission based on documentation of average or above-average intelligence, difficulty in one or more academic areas or learning processes, and a Specific Learning Disability (SLD) and/or Attention Deficit Hyperactivity Disorder (ADHD) diagnosis. Evidence that learning disabilities are not the result of primary emotional or behavioral problems is required.

Student Body/Student Life

The Fletcher School has two divisions: Lower and Intermediate Schools, Grades K-5, and Middle and Upper Schools, Grades 6-12. Our students are provided a comprehensive educational program through academic and co-curricular offerings, developing their academic and social competence.

Fletcher's structured and individualized learning environment emphasizes multisensory techniques supported by the Orton-Gillingham Approach. Instruction is sequential, cumulative, and emotionally sound to achieve mastery and ensure success for the student. Our students are taught to understand their unique learning styles, building the skills necessary to utilize their strengths.

Academic Overview

The Fletcher School develops and aligns its curriculum and instructional design with the mission and expectations for student performance. Curriculum and instruction create a structured, individualized, and multisensory learning experience that prepares students with learning differences and/or attention deficit disorders to reach their full potential. The college preparatory curriculum follows the North Carolina Future-Ready Course of Study based upon the Common Core State Standards.

The curriculum at The Fletcher School promotes the active involvement of students in the learning process, including opportunities to explore the application of higher-order thinking skills and to investigate new approaches to applying learning. Teachers utilize a variety of educational approaches in the learning process, including collaborative learning, educational outreach programs, and technology infused throughout. Ninth graders enroll in First Year Seminar, and twelfth graders enroll in Senior Exit class, which provide personalized assistance and guidance during these transitional years.

Levels of Independence

In addition to letter grades, faculty use an additional assessment technique to measure student progress in Grades 6-12. Each student is assessed based on "Levels of Independence" in eleven categories: Response Inhibition, Working Memory, Emotional Control, Sustained Attention, Flexibility, Task Initiation, Planning, Organization, Time Management, Goal-Directed Persistence, and Metacognition. Students' skills in each area are assessed using the following categories to measure executive skills: Beginning, Emerging, Progressing, and Mastering.

Teachers offer students differentiated and direct instruction in small group settings to support their needs based on their individual learning styles. The unique environment of The Fletcher School enables us to provide the following to every student:

- Wait time given for effective processing and understanding
- Use of alternative assessment techniques to match student's learning style
- A structured environment with classroom routines
- Digital literacy tools (Read & Write, Grammarly, iBooks)
- Advocacy skill development

- Development of executive skills: organization, study skills, and time management
- Repetition/reteaching
- Multisensory and multimodality instruction
- Study guides for tests
- Instruction paced according to the student's rate of learning
