Catrina Galvan

STEM CLERK

Catrina Galvan serves as the STEM Clerk for Tracy Unified School District, ensuring that every classroom from Preschool through 12th grade has the materials and resources needed to bring STEM learning to life. A proud TUSD alumna, Catrina values the opportunity to collaborate with the same educators who once inspired her as a student. She holds a Bachelor of Science in Business Administration from California State University, Stanislaus, and takes great joy in seeing students engage in hands-on experiences—from robotics and live science investigations to 3D printing—that spark curiosity and shape their futures.
