

Technology/Robotics Scholarship in Memory of Ken Black

This scholarship is in Memory of Ken Black who was always tinkering and building things since a young child. He would take nuts and bolts and build things from truly nothing. He had recently attended the STEAM Event sponsored by the East Islip School Business Partnership and was enthralled with the number of classes and employers that were in attendance. He was thrilled to see children of all ages be inspired by robotics and STEAM related classes and said he wished he had those classes when he was growing up. It is his family's desire to create a memorial scholarship in Ken's name that will inspire the next generation to build something from nothing and to think outside the box. Through creative thought and inspiration, you can design anything.

Are you interested in technology, robotics, building, and design? Then this is the scholarship for you.

Requirements:

- You must have taken at least 2 technology classes to qualify for this scholarship.
- Your post-graduation plans must include either going to work, trade school, or college.
- Attach your transcript.
- Attach a letter of recommendation from your technology teacher.

Applicant's Name: _____

Technology Classes Taken: 1. _____

2. _____

What is your post-graduation plan?

Write a short summary as to why robotics and technology inspire you.

Tell us about something creative that you have built or designed.

Thank you for applying for our scholarship. We hope you will fulfill all your dreams and that you never stop learning and designing. We will present the scholarship to the winner at the awards ceremony in June. Congratulations on your graduation and good luck in all your future endeavors!
