

TRANSPORTATION SERVICES MANAGEMENT

The Transportation Supervisor is the immediate supervisor of all bus drivers and mechanics. Drivers and Mechanics will receive instructions relating to their work assignment from the Transportation Supervisor with whom they will first consult when work-related problems arise. If a satisfactory resolution to a problem does not occur after having consulted with the Transportation Director, further steps may be taken in the following order:

1. If the problem remains unresolved, request a meeting with the Superintendent.
2. If the problem is still unresolved, the driver may request a meeting with the Board.

The above procedures are in effect in the case of nongrievable, work-related problems. If a problem arises which is covered as a grievance under the current negotiated contract, the adopted grievance procedure will be followed.
