Employee Engagement Survey: McMullen-Booth Elementary School

Results and Analysis

2025-2026

Project Overview

The Employee Engagement Survey asked staff members of Pinellas County Public Schools for feedback about various aspects of the work environment to better understand what is done well and to identify opportunities for improvement. Sogolytics partnered with district team members to develop the survey, which addressed the following topics:

All Staff:

- Overall Engagement
- Mission and Vision
- District and Site Leadership
- Feedback and Recognition
- Work Environment
- Career Growth and Training Opportunities

Campus-based Staff:

- Academic Support
- Student Support
- School Leadership
- Family Involvement
- Safety and Behavior

The survey was open from November 3 – December 19, 2025.

Email invitations with unique survey links were sent to all staff members. Reminder emails were sent to staff members who had not yet participated throughout the survey window.

The survey was translated into Spanish.

This report provides a district overview of site-level results. District-level reports and verbatim/open-ended response reports were also provided.

Findings for each item in the report exclude participants who did not answer. Data labels less than 5 percent are not shown in charts and graphs. Percentages may not add up to 100 because of rounding.

Details on Survey Design

Engagement is the connection that individuals have with their professions in general and their current jobs in particular. Several factors can affect an employee's engagement, including relationships with administrators, supervisors, colleagues, students, and parents; the physical work environment; perceptions of personal safety; policy considerations and implementation; support for professional development and growth; training; perceptions of personal relevance; and general satisfaction.

The Employee Engagement Survey consists of two parts:

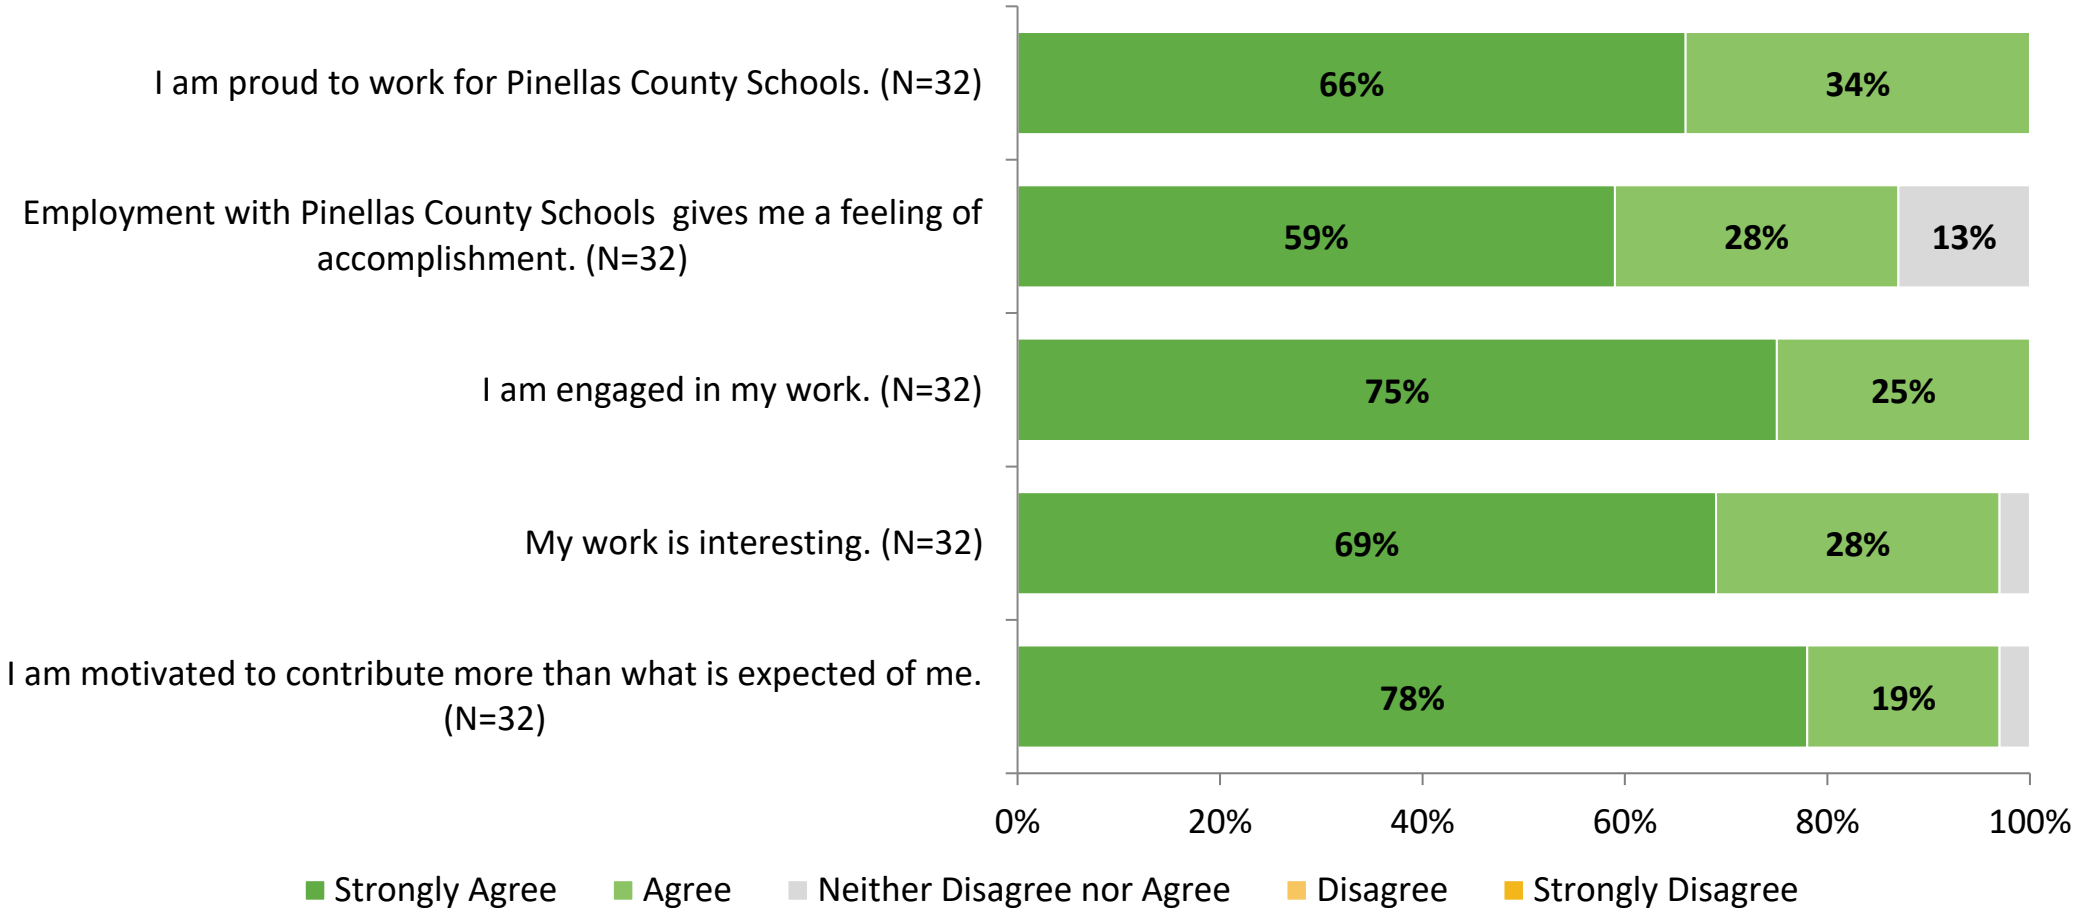

- **Overall Engagement** is composed of nine items designed to measure an employee's level of engagement. To calculate the engagement score, each response option was given a weight, ranging from 1 (Strongly Disagree) to 5 (Strongly Agree). Based on the average of the responses to these items, an engagement score is calculated for each survey participant. Engagement scores are classified as highly engaged (>4.5), engaged (3.5 to 4.5), and less engaged (<3.5).

- **Engagement Drivers** are items about different aspects of the work environment that may affect engagement. Participants answered each item using the 5-point Likert scale. Mission and Vision, District Leadership, Worksite Leadership, Work Environment, Feedback and Recognition, and Career Growth and Training Opportunities were evaluated as drivers of employee engagement.

Overall Engagement Classification

Responses to the nine overall engagement items were averaged to calculate an engagement score for each participant. Based on the average of the responses to these items, an engagement score is calculated for each survey participant. To calculate the engagement score, each response option was assigned a numerical value:

- Strongly Disagree = 1
- Disagree = 2
- Neither Disagree nor Agree = 3
- Agree = 4
- Strongly Agree = 5

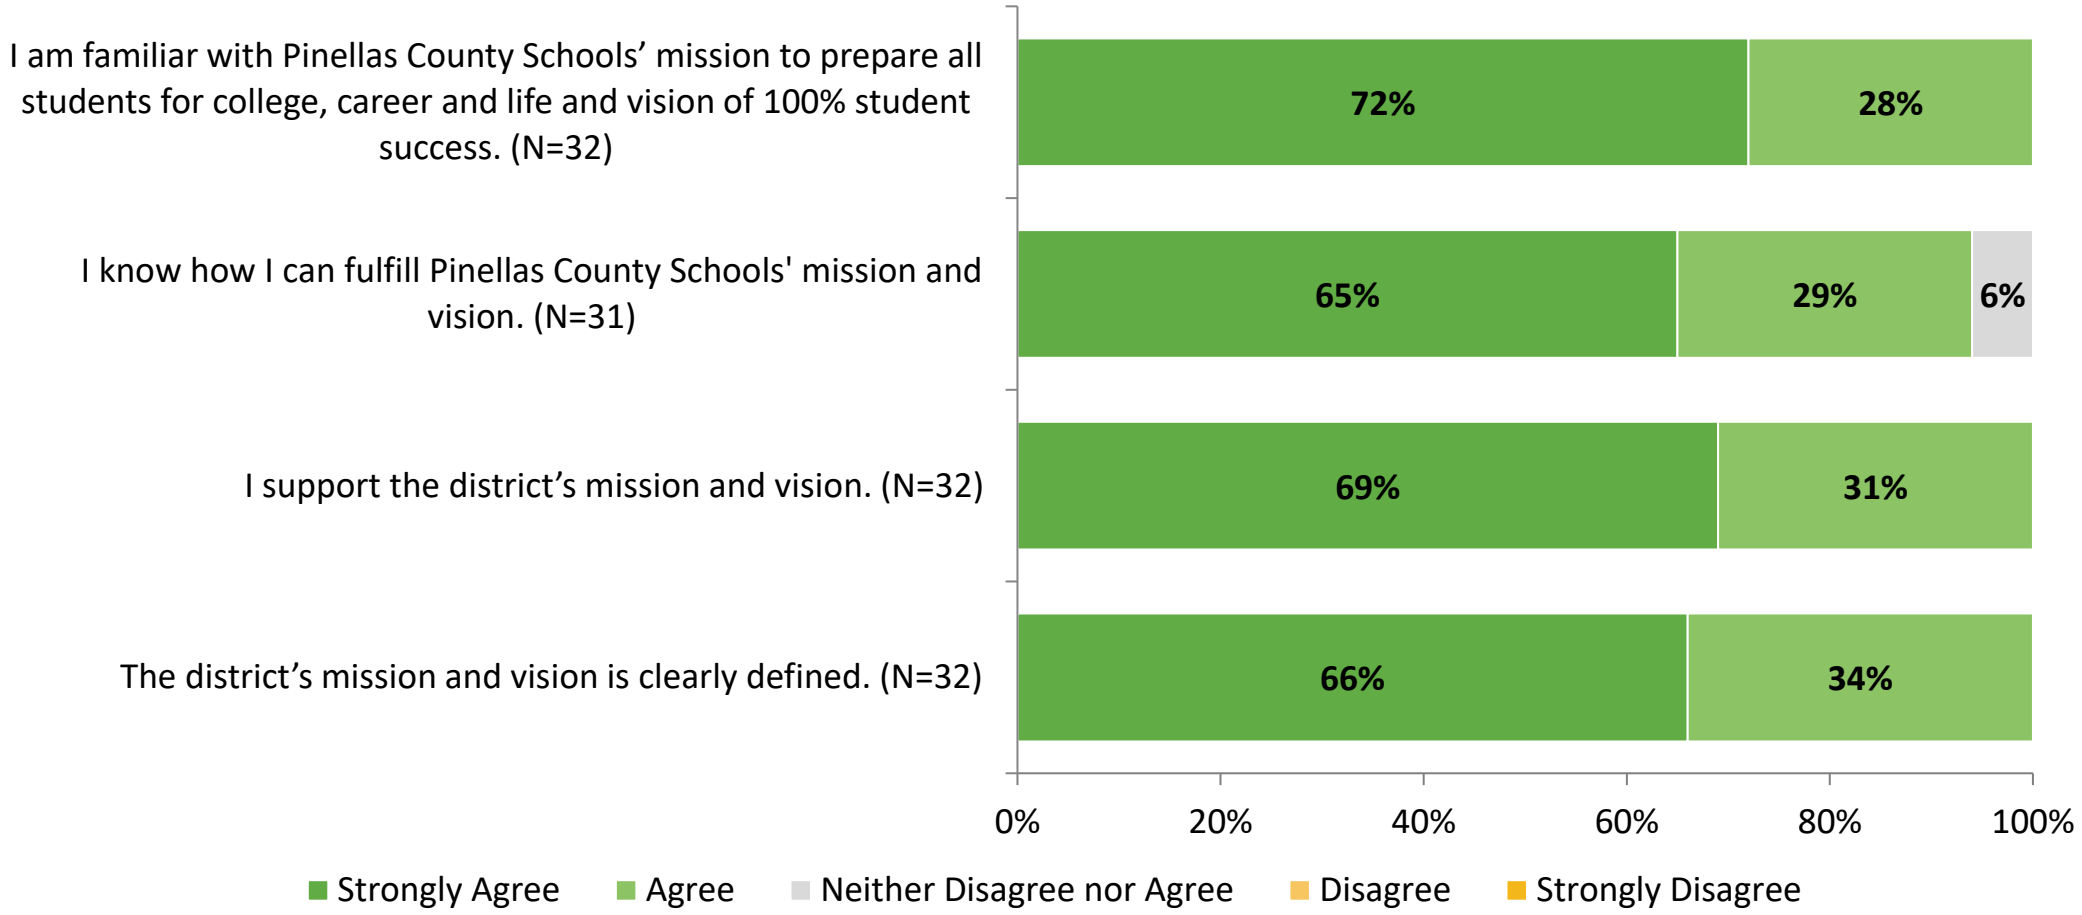

Average scores were classified into three levels: **Highly Engaged** (>4.5), **Engaged** (3.5 to 4.5), and **Less Engaged** (<3.5).

Focus Areas

Focus Areas to Increase Employee Engagement

Thirty-eight (drivers) were used to assess the school environment and identify opportunities to increase engagement. Each item was rated on a five-point scale, with higher values indicating stronger agreement.

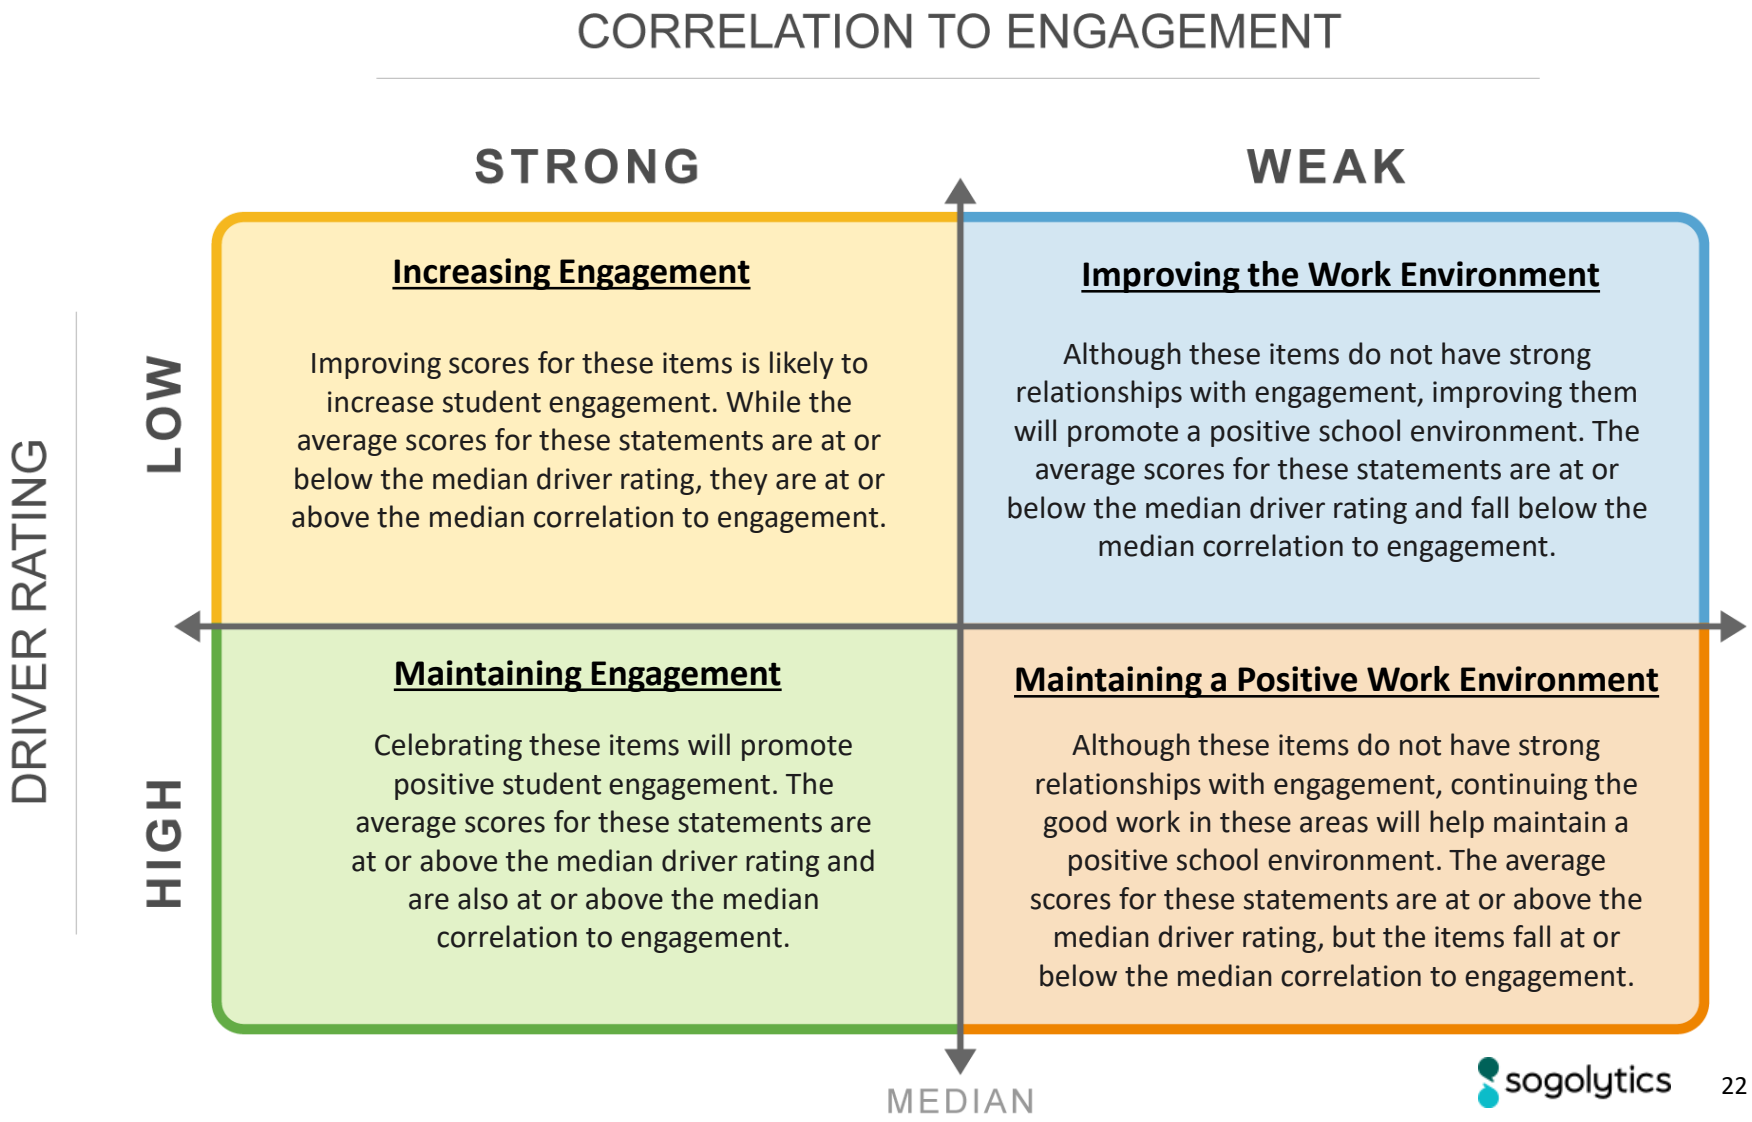

The relationship between each participant's responses (driver ratings) and their overall engagement score was analyzed. To do this, the strength of the relationship (the correlation coefficient) between the engagement score and each driver was calculated. Values can range from -1.0 to +1.0. The closer to +/-1.0, the stronger the relationship.

Driver ratings were classified as high or low based on the median driver rating. Correlations to engagement were classified as strong or weak based on the median correlation coefficient.

Focus areas are valuable for guiding the development of action plans by highlighting both successes and areas needing improvement, enabling districts and schools to prioritize efforts, allocate resources effectively, and implement targeted strategies. However, when sample sizes are below 30, the reliability of correlation estimates decreases due to greater variability. In such cases, focus areas with low or negative correlations should be interpreted cautiously and used alongside other tools to ensure well-rounded, data-informed planning. This cautious approach helps prevent misinterpretation of data that may not accurately reflect true relationships, especially in contexts with limited sample data.

Net Promoter Score

School Net Promoter Score

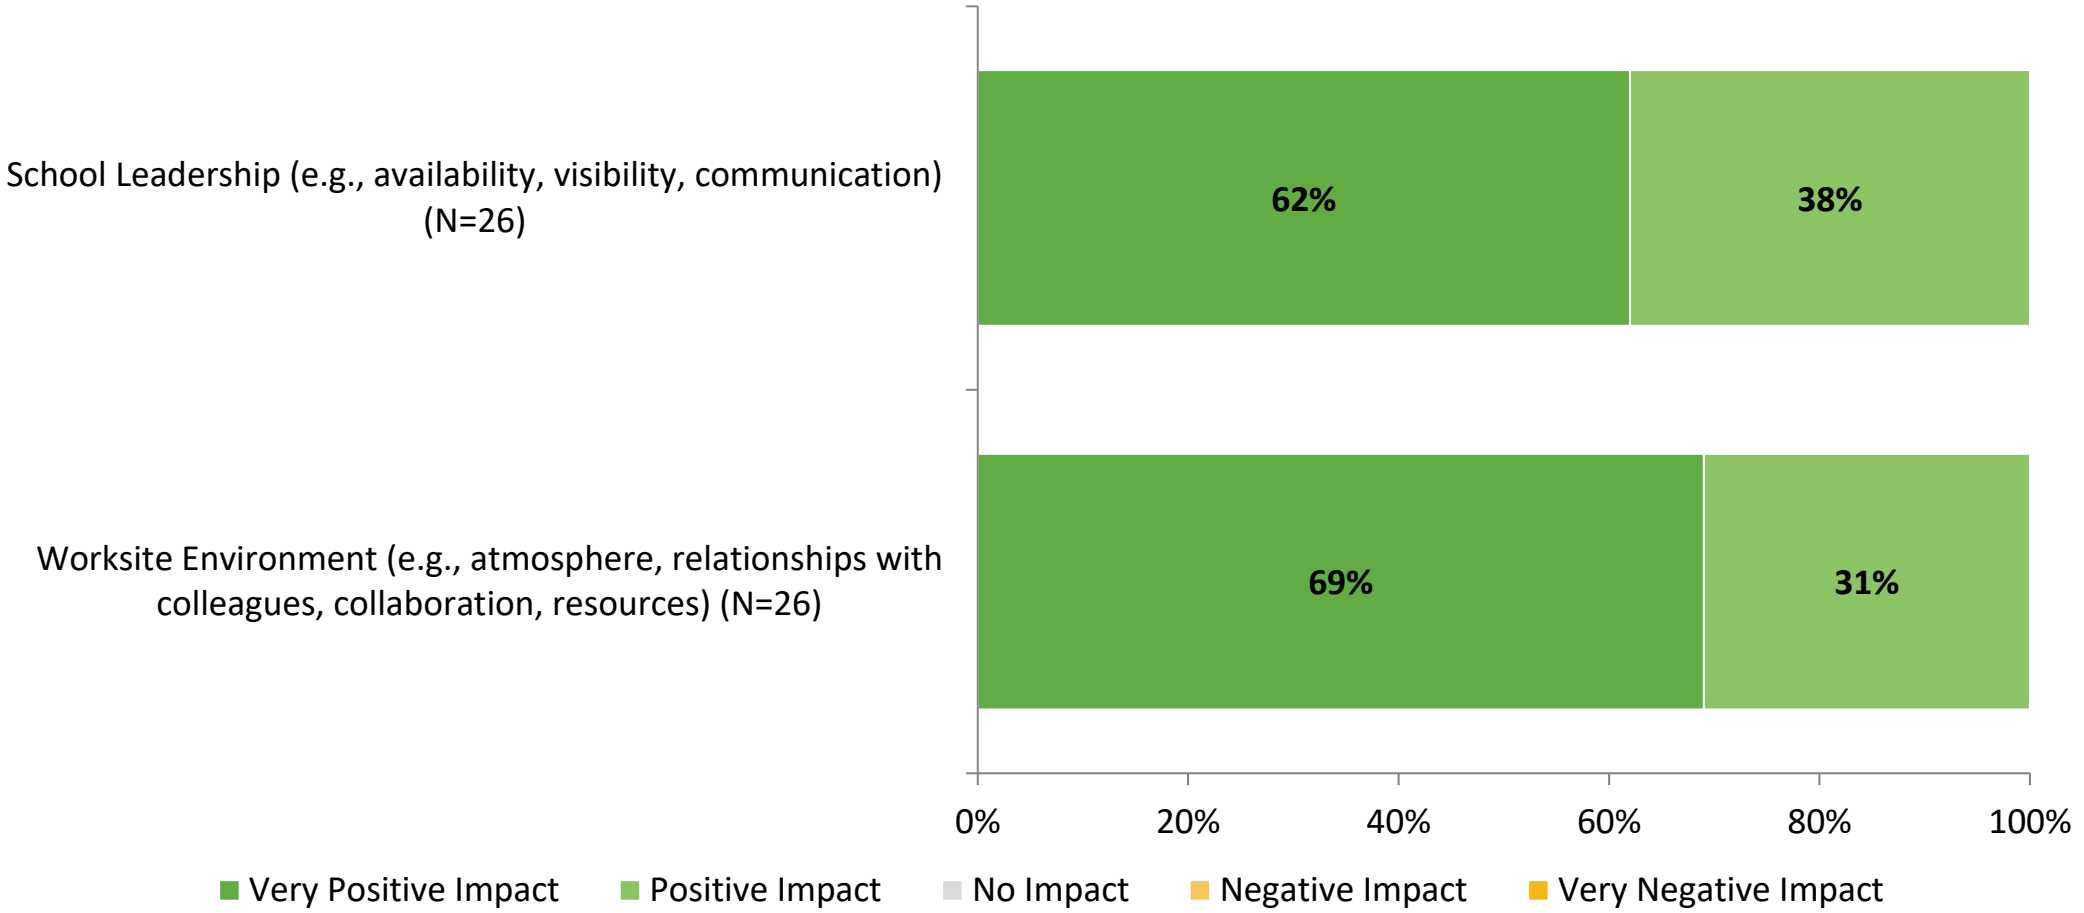

How likely is it that you would recommend your school to a family member or friend? (N=24)

Note: The Net Promoter Score (NPS) serves as a proxy for public confidence in the district and can potentially be connected to district growth. It is calculated by subtracting the percentage of detractors from promoters which gives a value between -100 to 100. A positive score means there are more people promoting the district than detracting from it. Passives represent individuals who do not have an unequivocal opinion about their school or district. The Net Promoter Score has been rounded to a whole number.
