

POWER BI – ESSA TRENDS

PURPOSE

This report has two pages:

- **Yearly Comparison:** Displays performance index scores and levels from year to year. Districts can examine whether a school or subgroup improved or declined compared to previous years. It includes any identified scenarios and accountability statuses for a selected year, school or subgroup.
- **Subgroup Benchmark:** Offers a side-by-side comparison of selected Accountability Indicators, to view how subgroups performed relative to other student subgroups, the district, and/or the county.

SUBGROUP BENCHMARK:

1. **Select the index** that you would like to compare.
2. **Choose a school and a subgroup** on each side of the report.
3. Compare how one subgroup did to another and how each compare to the county and the district.
