BMI Report Parent Opt Out Form

As part of a required school health examination, a student is weighed, and his/her height is measured. These numbers are used to figure out the student's body mass index or 'BMI'. The BMI helps the doctor or nurse know if the student's weight is in a healthy range or is too high or too low. New York State Education Law requires that BMI and weight status group be included as part of the student's school health examination.

A sample of NYS school districts will be selected to take part in a survey by the New York State Department of Health. When our school is selected to be part of the survey, we report information about our students' weight status groups/ BMI to the New York State Department of Health. The information sent to the New York State Department of Health will help health officials develop programs that help children be healthier. Only summary information is included in the Data, no names and no information about individual students is sent. However, you may choose to have your child's information excluded from this survey report. If you do not wish to have your child's weight status group information included as part of the Health Department's survey this year, please complete the form below and return it to your child's school nurse by **January 2 of the current school year.**

Please do not include my child's weight status information in the School BMI Survey.
