

MYSAEBRS SCREENING

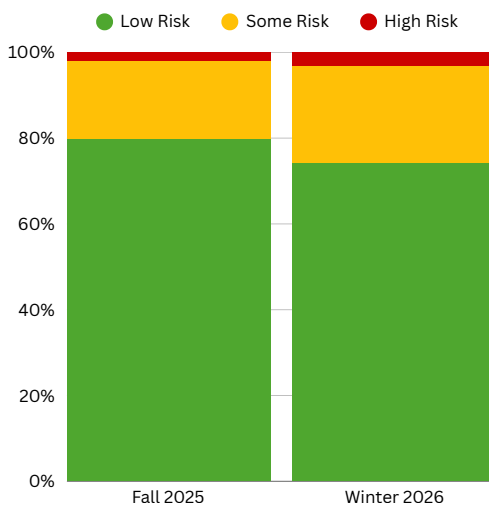

WHAT IS MYSAEBRS?

My Social, Academic, and Emotional Behavior Risk Screener or "MySAEBRS" is a brief, online, student self-report measure of behavior.

It allows us to better understand students' behaviors across three domains: social, academic, and emotional. Students' total scores from the three domains are categorized into **Low Risk**, **Some Risk**, and **High Risk**.

FALL AND WINTER MYSAEBRS RESULTS

Schoolwide Results

88% of the student body was screened during class meetings the week of January 12th. Of those screened, **75%** reported **Low Risk** this winter. The target is **80%** to ensure that most students benefit from universal social, emotional, and academic supports. This fall, **80%** of students reported **Low Risk**.

23% of the students screened this winter reported **Some Risk**. This was an increase of 5% since the fall. These students may need additional support.

3% of the students screened this winter reported **High Risk**. This was an increase of 1% since the fall. These students likely need additional support.

Percent of Students with Risk by Grade at Fall (F) and Winter (W) Screenings
