

What Do Ohio's Property Tax Changes Mean for Northeastern?

Recent changes to Ohio law have affected much school districts collect in property taxes—even when property values increase.

30.5% Increase in Local Property Values

Property values in our district rose significantly for FY2025.

13.3% Maximum Schools Can Collect

New state law limits school revenue growth to inflation over the past three years.

\$ \$2+ Million Projected Annual Revenue Loss

Beginning in 2027, our district is projected to lose more than \$2 million per year.

What This Means

Why doesn't a 30% increase help schools?

- Even though property values increased by 30.5%, state law caps how much revenue schools can collect at approximately 13.3%.
- The difference will lower taxpayers' property tax payments in August and, as a result, reduce the amount of funding the district receives.
- We are currently estimating the impact while we await final guidance from the Ohio Department of Taxation, which is expected by April 19, 2026.

Why It Matters Locally

Northeastern Local School District:

- Serves 2,857 students
- Spans 118 square miles
- Supports 400+ students receiving special education services
- Serves 43% economically disadvantaged students

We remain committed to:

- Protecting classroom instruction
- Making thoughtful, student-centered decisions
- Communicating openly with our community
