### From the Board President

Our recent workshop focused on our district goal of advancing student literacy rates. Administrators presented clear, data-driven updates showing progress in student growth, instructional alignment, and targeted supports, while also identifying areas where continued improvement is needed. We appreciate the leadership of our administrative team and the outstanding work of our CMTA educators and support staff, whose daily commitment drives this progress forward. We invite families and community members to attend one of three upcoming sessions focused on budget development and planning. These sessions will connect responsible fiscal planning to the priorities of our district and, most importantly, provide a meaningful opportunity for community voice and input as we shape the 2026-2027 school year.

*Elizabeth Owe*
