AJAC's Advanced Manufacturing Apprenticeships for Adult & Youth
The Youth Academy is a 2,000 hour program designed for high school juniors and seniors to develop career-ready skills in the aerospace and advanced manufacturing industries. This apprenticeship program combines paid on-the-job training at an AJAC employer and college-level classroom instruction which can lead to a high school diploma, journey-level card and short-term college certificate. The Manufacturing Academy (MA) is a joint program of South Seattle College and the **Aerospace Joint Apprenticeship Committee (AJAC)** designed for entry-level and re-entering professionals wanting to update and expand their skill set in the world of diversified and advanced manufacturing. This is an 11 week program earning 28 college credits. The MA is recognized by the State of Washington Labor and Industry as one of only 12 officially recognized pre-apprenticeships in the state. https://www.ajactraining.org/

Construction Laborers Apprenticeship Programs All over the region there are tower cranes and heavy equipment as well as roads, bridges and tunnels under construction. Those people in orange vests are skilled construction laborers. If you're up for the challenge, they've got a hard hat with your name on it. And we'll train you for free. Check out careers such as concrete setting, forklift driving, demolition, blueprint reading, flagging, tunnelling, etc. www.nwlett.org

Internships and Trade Programs

Sno Isle Tech Center is a tuition-free public technical high school for 11th/12th graders. Sno-Isle offers a variety of challenging learning experiences in diverse subject areas to give students advanced education and training. Graduates can then use this advanced education and training to walk right into an in-demand career or pursue further education often with an industry certificate and free college credit. They currently offer 24 programs in 5 career pathways. Application opens up in 10th grade. http://snoisletech.com/

Avionics - Everett Community College (EVCC)
Aircraft Electronics Technician training at Paine Field. Learn to maintain, troubleshoot and repair aircraft electronic systems earning 4 stackable certificates. Offered over a 2 quarter curriculum M-F. Must attend an open house to enroll. Stand alone program with entry opportunity to Aviation Maintenance Technology Program (AMTS). You can start this 20 credit program through Running Start. Must have completed Algebra 2.
https://www.everettcc.edu/programs/prof-tech-ed/aviation/avionics

Aviation Maintenance Technician School (AMTS): Our 8-quarter Aviation Maintenance Technician School (AMTS) curriculum consists of 2,247 hours of instruction in over 40 subject areas, with work being done on a variety of fixed wing aircraft and helicopters. Students learn to maintain both reciprocating and turbine engines, repairing systems and components. 60% of the students learning time is spent in a laboratory environment. Degree programs are available for students who desire to combine their technical training with academic classes. After completing the two-year AMTS program, students are eligible to take the FAA Written and Oral & Practical exams. Must be 18 to enroll in this program.https://www.everettcc.edu/programs/aamc/aviation/aviation-maintenance-technician-school
Avionics + AMTS + General Education Requirements = Bachelor's Degree
Suggested pathway:Juniors and Seniors; complete Avionics and General Ed. requirements, Post high school; complete AMTS.

Advanced Manufacturing Training and Education Center (AMTEC) - EVCC
The Advanced Manufacturing Training & Education Center (AMTEC) is a 54,000 sq. ft. modern facility that is operated by Everett Community College with another location in Arlington. AMTEC offers state-of-the-art training toward short, stackable certifications and certificates that build to college degrees and a pathway to family wage jobs in the manufacturing industry. Students have exposure to the full manufacturing cycle and can get high demand certificates in composites, mechatronics, machining, technical design, welding, and fabrication programs. Students work in cross-functional teams, developing critical thinking, problem-solving, and communication skills in a manufacturing setting. http://www.everettcc.edu/ccec/amtec
