Basic Circuitry & Programming

Learn the fundamentals of electrical systems and programmable logic controllers (PLCs) in this hands-on course sequence. Students are introduced to basic electrical terminology and gain practical experience wiring circuits, inputs, outputs, relays, and complete PLC systems using industry-standard Amatrol equipment. Workforce preparation training is also included to help students build professional skills and prepare for in-demand careers.

Industry Job Outlook

*Career opportunities in the industry of PLC's are expected to grow up to 3% through 2033 nationwide and **up to 25% in the industry of Electricians through 2030 in the Tulare County region.

*According to the US Bureau of Labor Statistics

** According to the State of California Employment Development Department

Cost

Registration Fee: Free

Upon successful completion of the course, student will receive Certificate of Completion
