

1930 Student Wellness Policy

Approved: February 22, 2018,

Amended: February 17, 2021; February 28, 2024; June 26, 2024; June 26, 2025;
February 26, 2026

The Board of Directors of Altus Schools San Diego, Inc. hereby adopts this Student Wellness Policy to apply to Altus Schools Audeo and Altus Schools Charter School of San Diego, hereafter collectively referred to as “Charter School.” Charter School adopts this policy to ensure its commitment to the optimal development of every student. Charter School believes that for students to have the opportunity to achieve personal, academic, developmental and social success, we need to create positive, safe and health-promoting learning environments at every level, in every setting, throughout the school year. This policy may be updated from time to time as required to be in compliance with state law, regulation, or administrative directive.

Research shows that two components, good nutrition and physical activity before, during and after the school day, are strongly correlated with positive student outcomes. Conversely, less-than-adequate consumption of specific foods including fruits, vegetables and dairy products, is associated with lower grades among students. In addition, students who are physically active through active transport to and from school, recess, physical activity breaks, high-quality physical education and extracurricular activities – do better academically. Finally, there is evidence that adequate hydration is associated with better cognitive performance.

This Policy outlines Charter School’s approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. Specifically, this Policy establishes goals and procedures to ensure that:

- Students in the Charter School have access to healthy foods throughout the school day—and other foods available throughout the Charter School resource centers—in accordance with Federal and state nutrition standards.
- Students receive quality nutrition education that helps them develop lifelong healthy eating behaviors.
- Students have opportunities to be physically active before, during and after the school day.
- The Charter School engages in nutrition and physical activity promotion and other activities that promote student wellness.
- Charter School staff are encouraged and supported to practice healthy nutrition and physical activity behaviors in and out of school.
- The community is engaged in supporting the work of the Charter School in creating continuity between Charter School and other settings for students and staff to practice lifelong healthy habits.
- The Charter School establishes and maintains an infrastructure for management, oversight, implementation, communication about and monitoring of this Policy and its established goals and objectives.

This Policy applies to all students, faculty, and staff in the Charter School. Specific measurable goals and outcomes are identified within each section below.

Wellness Policy Implementation, Monitoring, Accountability and Community Engagement

Implementation Plan

Using the steps outlined below, the Charter School will ensure the Charter School meets legal obligations regarding implementation of this Policy.

This Policy and the progress reports can be found on the school website.

Recordkeeping

The Charter School will retain records to document compliance with the requirements of this policy in the main office. Documentation maintained in this location will include but will not be limited to:

- The written Policy.
- Documentation demonstrating that the Policy has been made available to the public.
- Documentation to demonstrate compliance with the annual public notification requirements and community involvement requirements.
- Documentation of the triennial assessment of the Policy.
- Documentation demonstrating the most recent assessment on the implementation of the Policy has been made available to the public.

Annual Notification of Policy

The Charter School will actively inform families and the public each year of basic information about this Policy, including its content, any updates to the Policy, and implementation status. The Charter School will make this information available via the Charter School website and/or Charter School-wide communications. The Charter School will provide as much information as possible about the Charter School nutrition environment. This will include a summary of Charter School's events or activities related to Policy implementation.

Triennial Progress Assessments

At least once every three years, the Charter School will evaluate compliance with the wellness policy to assess the implementation of the Policy and include:

- The extent to which the Charter School is in compliance with this Policy;
- The extent to which the Charter School's Policy compares to model wellness policies; and
- A description of the progress made in attaining the goals of the Charter School's Policy.

The position/person responsible for managing the triennial assessment and contact information is:

Student Access and Support Services Administrator
858-678-4818

The Deputy Superintendent School Services and Founding Director will monitor the Charter School's compliance with this Policy.

The Charter School will actively notify households/families of the availability of the triennial progress report.

Revisions and Updating the Policy

The Charter School will update or modify this Policy as appropriate based on the results of the annual Charter School Health Index and triennial assessments and/or as Charter School priorities change; community needs change; wellness goals are met; new health science, information, and technology emerges; and new Federal or state guidance or standards are issued. This Policy will be assessed and updated as indicated at least every three (3) years, following the triennial assessment.

Community Involvement, Outreach and Communications

The Charter School is committed to being responsive to community input, which begins with awareness of the Policy. Charter School will actively communicate ways in which representatives of the Charter School and others can participate in the development, implementation and periodic review and update of this Policy through a variety of means. The Charter School will also inform parents of the improvements that have been made to school meals and compliance with school

meal standards, availability of child nutrition programs and how to apply, and a description of and compliance with Smart Snacks in Charter School nutrition standards.

The Charter School will use electronic mechanisms, such as email or displaying notices on the Charter School's website, as well as non-electronic mechanisms, such as newsletters, presentations to parents, or sending information home to parents, to ensure that all families are actively notified of the content of, implementation of, and updates to this Policy, as well as how to get involved and support the Policy. The Charter School will ensure that communications are culturally and linguistically appropriate to the community and accomplished through means similar to other ways that other local schools are communicating important school information with parents.

The Charter School will actively notify the public about the content of, the implementation of, and any updates to the Policy annually, at a minimum. The Charter School will also use these mechanisms to inform the community about the availability of the annual and triennial reports.

1. **Nutrition**

Charter School Meals

The Charter School is committed to promoting healthy food choices. It currently provides adequate and nutritious meals consistent with the requirements of state law and does not participate in federal or state programs related to school meals. To the extent any foods are made available to students at Resource Centers; Charter School will ensure such foods:

- Are accessible to all students.
- Are appealing and attractive to children.
- Are served in clean and pleasant settings.
- Meet or exceed current nutrition requirements established by local, state, and Federal statutes and regulations

Water

To promote hydration, free, safe, unflavored drinking water will be available to all students throughout the operational hours of the Resource Centers. Charter School will make drinking water available where school meals are served during mealtimes.

Competitive Foods and Beverages

The Charter School is committed to ensuring that all foods and beverages available to students at the school Resource Centers during the school day support healthy eating. Smart Snacks aim to improve student health and well-being, increase consumption of healthful foods during the school day and create an environment that reinforces the development of healthy eating habits.

The Charter School does not generally sell food at the Resource Centers and school administration offices. However, in the event that Charter School decides to sell food in the future, and to support healthy food choices and improve student health and well-being, all foods and beverages outside the reimbursable School meal programs that are sold to students at the Resource Centers during the school day will meet or exceed the USDA Smart Snacks nutrition standards. These standards will apply in all locations and through all services where foods and beverages are sold, which may include, but are not limited to, à la carte options in cafeterias, vending machines, school stores and snack or food carts.

As long as a student has been provided the maximum of one nutritionally adequate free breakfast meal and one nutritionally adequate free lunch meal free of charge regardless of the student's eligibility for federally funded free or reduced-price meals, the Charter School is not prohibited from selling to the student, the entrée from an **additional** nutritiously adequate meal that qualifies for federal reimbursement, from the same meal service.

Celebrations and Rewards

All foods offered on the Charter School Resource Centers will meet or exceed the USDA Smart Snacks in Charter School nutrition standards, including through:

1. Celebrations and events. The Charter School will provide a list of healthy party ideas to parents and teachers, including non-food celebration ideas.
2. Resource Center snacks brought by parents. The Charter School will provide to parents a list of foods and beverages that meet Smart Snacks nutrition standards.
3. Rewards and incentives. The Charter School will provide teachers and other relevant school staff a list of alternative ways to reward children. Foods and beverages will not be used as a reward, or withheld as punishment for any reason, such as for performance or behavior.

Fundraising

The Charter School does not generally host fundraisers at Resource Centers. However, in the event such a fundraiser occurs, foods and beverages that meet or exceed the USDA Smart Snacks in Charter Schools nutrition standards may be sold through fundraisers at the Charter School Resource Centers during the school day. The Charter School will make available to parents and teachers a list of healthy fundraising ideas.

Nutrition Promotion

The Charter School will promote healthy food and beverage choices for all students throughout the school Resource Centers, as well as encourage participation in school meal programs. This promotion will occur through at least:

- Implementing at least ten evidence-based healthy food promotion techniques through the school meal programs using Smarter Lunchroom techniques described above; and
- Ensuring 100% of foods and beverages promoted to students meet the USDA Smart Snacks in Charter School nutrition standards.

Food and Beverage Marketing in Schools

The Charter School does not generally allow food and beverage marketing at Resource Centers. However, in the event such activity occurs, any foods and beverages marketed or promoted to students on the school Resource Centers during the school day will meet or exceed the USDA Smart Snacks in School nutrition standards such that only those foods that comply with or exceed those nutrition standards are permitted to be marketed or promoted to students.

As the Deputy Superintendent School Services and Founding Director reviews existing contracts and considers new contracts, equipment and product purchasing (and replacement) decisions should reflect the applicable marketing guidelines established by this Policy.

2. Physical Activity

The Centers for Disease Control ("CDC") recommends that all children and adolescents participate in a minimum of sixty (60) minutes of physical activity every day. The CDC recommends that aerobic activity make up the bulk of such physical activity, with vigorous-intensity aerobic activity on at least three days per week. The CDC also recommends

that physical activity include muscle strengthening activities, such as gymnastics or push-ups, on at least three days per week, and bone strengthening activities like jumping rope or running at least three days per week. The Charter School has the following specific goals to promote student wellness, consistent with this Policy:

- All students will have access to Physical Education coursework
- All students will be offered Health education coursework
- All teachers will be given annual professional development focused on student health In developing these goals, the Charter School reviewed and considered evidence-based strategies and techniques and parent input. The Charter School will work toward achievement of these goals by:
 - Updating the Safety Plan annually to remain current on school safety protocol
 - Providing a clean and safe place for students to eat while at the Resource Center if needed
 - Annually surveying students and parents on areas of strength and areas for improvement
 - Annually conducting Open House and Senior Exit Orientations to gather feedback from students and parents on Resource Center operations

3. **Other Activities that Promote Student Wellness**

The Charter School will integrate wellness activities across the entire Charter School setting, not just in the cafeteria, other food and beverage venues and physical activity facilities. The Charter School will coordinate and integrate other initiatives related to physical activity, physical education, nutrition and other wellness components so all efforts are complementary, not duplicative, and work towards the same set of goals and objectives promoting student well-being, optimal development and strong educational outcomes.

All efforts related to obtaining federal, state or association recognition for efforts, or grants/funding opportunities for healthy school environments will be coordinated with and complementary of this Policy, including but not limited to ensuring the involvement of parents and the community.

All Charter School-sponsored events will adhere to this Policy's wellness guidelines. All Charter School-sponsored wellness events will include physical activity and healthy eating opportunities when appropriate.

Community Partnerships

The Charter School will continue to develop and enhance its *current efforts* in relationships with community partners (e.g., hospitals, universities/colleges, local businesses, SNAP-Ed providers and coordinators, etc.) in support of this Policy's implementation. Existing and new community partnerships and sponsorships will be evaluated to ensure that they are consistent with this Policy and its goals.

Professional Learning

When feasible, the Charter School will offer annual professional learning opportunities and resources for staff to increase knowledge and skills about promoting healthy behaviors in the classroom and school (e.g., increasing the use of kinesthetic teaching approaches or incorporating nutrition lessons into math class). Professional learning will help the Charter School staff understand the connections between academics and health and the ways in which health and wellness are integrated into ongoing district reform or academic improvement plans/efforts.
