Graduation Alliance™

ABOUT YOUR DISTRICT'S GRADUATION ALLIANCE PROGRAM

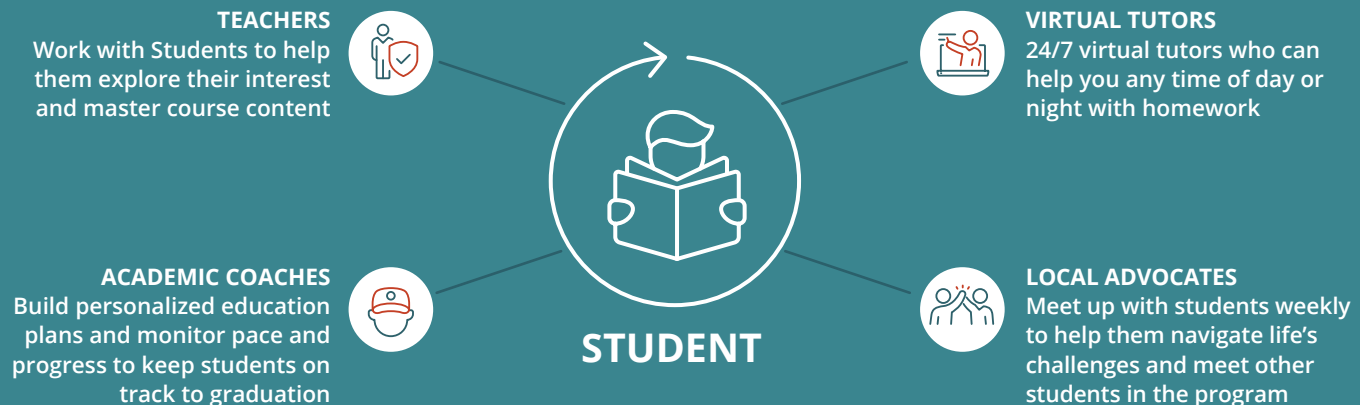

As educators, our goal is to ensure every student gets to graduation. We've expanded our district's alternative education toolbox through a partnership with Graduation Alliance. This partnership provides students with a flexible, supportive graduation pathway for students who **can't or won't attend in-person school** and have **exhausted other alternative education options.**

Students who enroll in the program remain a student of and graduate with a diploma from the district. This program provides flexibility, accountability, and support through:

- 100+ teacher-led, asynchronous online classes
- 360 degrees support for academic barriers and life challenges
- 24/7 virtual tutoring services
- A free internet-enabled Google Chromebook with full IT support

Graduation Alliance's multi-tiered system of supports sets this program apart from other online alternative programs — and what makes it so successful. Based on a 2021 study by Mission Measurement, **the program significantly outperformed the national benchmark for dropout recovery programs** established by the Impact Genome Project on both efficacy and cost per outcome, providing 27% more outcomes for 33% less cost.

Here's how the 360-degree support system works:

THE ENROLLMENT PROCESS

Once a Graduation Alliance enrollment counselor receives a referral, this is the process we follow to enroll a student. It usually takes 1-2 business days for a student to get enrolled in your district's Graduation Alliance program, but the timeframe is dependent upon the student or their parent/guardian submitting their enrollment documents.

1. The Graduation Alliance enrollment team will reach out to the referred student using the contact information provided by the district, including emergency contacts. The enrollment counselor will reach out to students up to 8 times using a multi-channel outreach strategy, including phone calls, text messages, and emails.

2. When the enrollment counselor successfully connects with the student and confirms interest in the program, the enrollment process begins. There are three main items on Graduation Alliance's enrollment to-do list:

    - **Financial Responsibility Form** — This acknowledges consent for the student to be enrolled in the program and identifies which students need a program-provided laptop and wifi hotspot.
    - **Health Course Letter** — If a health course is required by your state, this letter will be included. It notifies parents of the content of the health course and requires them to acknowledge it via signature.
    - **I Will Graduate Course** — Students must start this online orientation course in order to be officially enrolled in the program.

3. Your district may require additional enrollment documentation. Your program manager will be able to walk you through any additional forms or documents required for the enrollment process.

If you have any questions about your district's Graduation Alliance program, please contact your program manager!
