

Kiosks!

presented by SAPS club

By Simon Morgan

Right now

- People do not know enough about our forest
- Map not very accessible or exists
- People do not know where they are going
- Natives are not included

The solution may be...

Things I will do

Talk to Ice age trail

I will talk to someone from the Ice age trail to figure out what needs to be put on a sign and how to get/build one.

find a suitable place

go to school forest and find a place that would be the most beneficial

find a suitable amount of money

we are on a budget due to having a split budget with another SAPS project, the bell tower. We could combine with them

Will I do small signs around the area

do I have the time/budget to do smaller things such as smaller signs around the forest, scavenger hunt, etc

**Can we get a kiosk at
the school forest?**

Things to think about

Can it be portable? The Forest Committee has asked if it could be portable

Can we use what Ice age Trail has done to make our kiosk?

How do natives want to be represented? I will talk to someone about this

Outcome

People will know more about the forest

Map is more accessible. There will be a QR code for this

People will have a way better idea of where they are

Natives will be better represented

*Thank
You*
