

To Whom it May Concern,

Our school district, Richland One, is committed to providing equitable access to all educational resources for our students, including those with disabilities. Considering the evolving legal landscape in South Carolina regarding digital accessibility in educational settings, we are proactively working to ensure all our digital resources meet current accessibility standards.

To this end, we require accessibility statements for all digital resources currently provided to or being considered for use within our district. These statements should clearly outline the level of conformance with relevant accessibility guidelines, such as the [Web Content Accessibility Guidelines \(WCAG\) 2.1 Level AA](#) and provide details on any known accessibility barriers.

Specifically, we request documentation that addresses the following:

- **Conformance Level:** Please indicate the level of conformance your resource achieves with WCAG 2.1 Level AA or other relevant accessibility standards.
- **Accessibility Features:** Describe any built-in accessibility features or functionalities that support users with disabilities.
- **Known Limitations:** If there are any known accessibility limitations, please clearly identify them and outline any plans for remediation.
- **Contact Information:** Provide contact information for any accessibility-related inquiries.
- **Voluntary Product Accessibility Template (VPAT):** If available, a current VPAT would be greatly appreciated as it often provides a comprehensive overview of a product's accessibility.

Understanding the accessibility of your digital resources is crucial for us to make informed decisions and ensure compliance with South Carolina's changing legal requirements regarding accessibility in education. We understand that creating these statements may require time and effort, and we appreciate your prompt attention to this important matter.
