

BMS Frequently Used Apps - Available on the Dashboard

Edpuzzle

Edpuzzle allows teachers to create interactive video lessons where students will have to answer questions to progress through the video.

GradeCam

GradeCam is a testing platform where teachers create multiple-choice assignments to be graded electronically. Students may log into GradeCam after a test to see results.

OER

OER: Online Educational Resources: WCS created online social studies textbook and student resources. CK-12 is the textbook accessed through the OER.

Kami

Kami is an online document annotation and markup tool. Students can add text, highlights, underline, or shapes to a PDF or other document. Students can turn in assignments directly from Kami. Kami also has a read aloud function.

Performance Matters

Performance Matters is a testing platform where students take Benchmarks (district created tests at the end of the nine weeks) and CFA (common formative assignments) created by teachers to monitor student mastery of standards. In the Student Portal, all test results are visible, and many tests are available to review student results question by question.

Skyward

Skyward is our School Management Software where schedules and grades are posted. You also have access to your student's username and password to get to their Schoology. Click on a grade to see the individual assignments.

Securly

Securly allows teachers and administrators to monitor students using district Chromebooks, laptops and desktop computers. (Not visible on students' dashboard)

Flextime Manager (FLEX)

Flextime Manager is an app used by students to select a 3rd period Thrive session (class) to attend.

E Hall Pass

E Hall Pass is a digital hall pass system with live tracking of students' location to maximize instructional time, reduce hallway traffic, and improve student outcomes.

Bullying Stops Here

Bullying Stops Here is an app where students can report bullying. Reports come directly to BMS administrators.

Pear Assessment

Pear Assessment is a technology-enhanced assessment solution designed to check for understanding, differentiate support, and adjust instruction.

Schoology

Schoology is the Learning Management System used in grades K-12. Each class has their own page where students can access assignments and resources. Students have a calendar at the top of the page to monitor when assignments are due. It also has a messaging program for students to contact their teachers.

SAVVAS

SAVVAS is an online ELA textbook and assessment platform in Schoology (ELA benchmarks are on this platform)

McGraw-Hill

McGraw-Hill is the current math adoption for textbooks in Schoology. Part of the adoption is ALEKS, an adaptive learning program. Math teachers can add their own assignments in ALEKS, and it has a feature that efficiently identifies exact topics each individual student has mastered, and ones they are ready to learn.

STEMscopes

STEMscopes is a science and math online platform that combines digital tools like interactive simulations and reading materials (STEMscopedia) with physical science kits and print resources.
