

Ottawa Hills Local Schools

January 2026

Dear Parents and Guardians,

The district will soon be administering state-required tests to grades 3 through 11. These tests provide teachers and the district valuable data that is used to inform our curriculum and instruction. At the high school level, the tests also afford students the opportunity to meet graduation requirements. Printed on the reverse side of this letter is a schedule of those tests for your reference.

Student attendance is very important during this testing period. Both students and teachers have spent an admirable amount of time working through the curricula these tests are designed to assess, and we find that students perform best when tested with their peers. But, should a student be unable to attend school during the regularly scheduled testing period, we will make every effort for him or her to make up the missed test(s) upon returning to school.

For more information about state tests, you can go to Education.Ohio.Gov or feel free to contact me if you have any questions.

Sincerely,

Dr. Bill Miller
Assistant Superintendent
Curriculum and Instruction
