IB Diploma

Choose Your Challenge | Create Your Premium Program

The Premium High School Course

Students study core requirements essential for university admissions in the final two years of High School. This program of study includes Mathematics, Science, Social Science, Modern Language, English, Nature of Knowing and Personal and Professional Skills. A mandatory Creativity, Activity, and Service (CAS) component, alongside a collaborative science project, is also part of this program...

... leading to an Accredited U.S. High School Diploma.

IB Courses

Students can choose to switch at least one or a maximum of six High School Courses with an IB subject. This flexible option allows students to explore their interests and strengths...

... earning both an Accredited U.S. High School Diploma and IB Course certificates in the IB Subjects they select.

International Baccalaureate Diploma Program (IBDP)

The IBDP offers a holistic pre-university challenge. Students study six subjects at the Standard or Higher Level, including Mathematics, Science, Humanities, The Visual and Performing Arts, Modern Language, and English. They also undertake an Extended Essay, explore the Theory of Knowledge, and engage in Creativity, Activity, and Service (CAS).

Completing the IB Diploma Program earns you the prestigious IB Diploma alongside a U.S. High School Diploma

The hallmarks of all three courses include all the added benefits necessary to serve our students:

Individualized Learning:

AISK recognizes every student's uniqueness, offering a curriculum that encourages self-discovery and personal growth.

Emphasis on Core Subjects:

Our program focuses on essential subjects like Mathematics, Language, Humanities, Science, and Modern Languages, aligning with global university requirements.

Holistic Development:

Beyond academics, our program fosters vital skills such as organization, teamwork, and problem-solving, which are essential for higher education and the modern workforce.

Flexibility:

Our flexible learning environment empowers students to shape their education, whether pursuing the IB Diploma Programme or blended IB courses and Accredited US High School courses.

Experienced Faculty:

AISK boasts well qualified and experienced national and international teachers providing personalized support.

College Counseling:

In-house College and Career Counseling provides guidance to all students on resumes, college applications, essays, and university selection, ensuring students are prepared for the next step.

SAT Preparation:

Our in-school SAT prep empowers students to excel, offering support and boosting confidence for future opportunities.

Subject Selection

The Arts & Physical Education	Theatre (SL/HL) Visual Arts (SL/HL) Film (Pamoja)	Theatre Music Physical Education	

Beyond academics, AISK focuses on developing essential skills such as personal organization, teamwork, and problem-solving.

These skills are critical for success in higher education and the modern workforce.

With a dedicated faculty and a focus on holistic development, AISK's Premium High School Program prepares students for academic excellence, personal growth, and a successful future.

The Nature of Knowing

This is a year-long course designed for grade 11 students. The course explores the complexities and inconsistencies of human thinking, aiming to cultivate critical awareness and deep reflection. Students will analyze how beliefs, assumptions, and areas of knowledge studied shape our understanding of the world, and will be challenged to question the certainty of what we "know."

With a focus on preparing students for the decision-making demands of university, adulthood, and engaged citizenship, the course emphasizes intellectual curiosity, self-awareness, and open-minded discussion.

Through the development of critical thinking, communication, and collaborative skills, students will become more informed, ethical, and responsible thinkers.

Personal and Professional Skills (PPS)

This is a year-long course designed for grade 12 students as they prepare to transition beyond high school. The course develops essential intrapersonal and interpersonal skills, such as critical thinking, communication, resilience, and ethical awareness, that support success in academic, professional, and personal contexts. Students will practice skills that prepare them for college applications, interviews, internships, and future career opportunities while also strengthening their self-awareness and leadership abilities. With a focus on adaptability, reflection, and responsibility, PPS empowers students to confidently navigate higher education, the workplace, and life as engaged global citizens.

Advisory Program

At AISK, in accordance with our mission statement, we believe that in order for young adults to thrive, explicit focus needs to be paid to foster transdisciplinary skills and social and emotional competencies such as self-awareness and self-leadership, resilience and empathy, interpersonal communication and conflict resolution. As such, we have developed a rich Advisory program that focuses on building belonging and community while nurturing these life-worthy skills.

Integrative Learning the AISK Way

Incorporating Core Values and IB Learner Profile

AISK's Core Values - excellence, respect, integrity, and empowerment - are integrated into the school's culture. These values serve as guiding principles for students' behavior and actions, promoting character development and important life skills.

The IB Learner Profile, emphasizing attributes like inquirer, communicator, open-minded, caring, and reflective, provides a framework for nurturing these skills throughout the curriculum.

Approaches to Learning (ATLs)

AISK aligns its learning expectations with the IB's Approaches to Learning (ATLs), designed to cultivate transdisciplinary skills that support success in learning and life. These encompass essential thinking and research skills alongside communication, self-awareness/self-management, and social skills.

Dedicated Life Skills Curriculum

AISK embraces the importance of social and emotional learning (SEL) competencies and their impact on both academic learning and human development. SEL competencies are embedded in academic classes with a focus on belongingness, collaborative learning, self-awareness and self-management, and resilience. In addition, these competencies are the explicit focus of our dedicated Advisory time.

Project-Based Learning

Project-based learning is a cornerstone of AISK's approach. Students engage in hands-on projects that require collaboration, creative thinking, and problem-solving. These projects often have real-world relevance, enhancing the application of skills.

Collaborative Learning Environments

Students regularly work together on projects, exchange ideas, and engage in peer-to-peer learning, building strong teamwork and communication skills.

Extracurricular Activities and Clubs

Through clubs and activities such as debate, drama, and Model UN, students explore interests and develop soft skills outside the classroom while developing communication, critical thinking, and open-mindedness.

Community Engagement

Service-learning projects connect students with the wider community, fostering empathy, a sense of responsibility, an understanding of diverse perspectives and global awareness.

Global Perspectives

Students are exposed to diverse cultures, languages, and ideas, promoting international mindedness, empathy, and global awareness.

Teacher Training and Professional Development

AIK invests in ongoing teacher training and professional development to ensure the faculty can effectively teach and nurture soft skills. Teachers use inquiry-based methods, differentiation, and assessment-informed teaching to enhance student learning.

Digital Literacy Integration

In a digital age, AIK integrates digital literacy across subjects, teaching students to use technology responsibly and effectively. Digital Integration includes information and media literacy skills.

Mentorship and Guidance

AIK provides mentorship and guidance through peer support and dedicated counselors (social/emotional and college/career) to nurture students' growth, help them set goals, reflect, and build resilience.

AIK integrates life skills into its culture, curriculum, and teaching, striving to create an environment that fosters their development and prepares students for the future job market.
