

SNAPOLGY

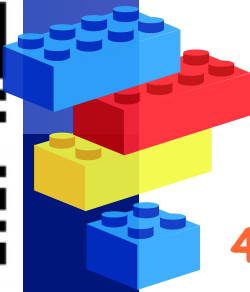

Terra Linda Elementary School

Take your student's LEGO® skills to the next level! Using LEGO® Spike Prime, students build military-inspired robots and master the code to control them. They'll dive into the mechanics of speed and power, using sensors to solve complex "real-world" tasks in a team environment. It's a high-stakes, high-fun masterclass in problem-solving and innovation. **Your child will build, code, and have a total BLAST!**

At Snapology, we believe learning should be fun and that playtime can be learning time.
