SDMC Minutes

March 2, 2026 at 4:15pm in Tanglewood Library

Dr. Kamla began the meeting at 4:15pm

1. **Data** - She reviewed the growth and achievement for all subjects from BOY to MOY in terms of NWEA Map testing. Over half of our students met their goals and showed positive growth. We held a celebration on February 6th, to celebrate those achievements. We are aiming to beat those achievement and growth numbers by the EOY. Science is showing a preponderance of "green" in their achievement and growth data.

8th grade Algebra is in the blue and in a great position for students to pass their EOY test and earn a high school credit for the course.

 Tanglewood NWEA data 2025-26.pptx

2. **Initiatives** - Initiatives include all of our math move to ACC for 6th and 7th grade. After 7th grade, students that pass STAAR will take Algebra I in 8th grade and those that do not will take on level math in 8th grade. Intervention classes will be offered in addition to math classes, for students that did not pass staar. Electives will be affected by the change in the scheduling for students with more than one math class. [Accelerated Math Overview - Community.pptx](#)

We will possibly be offering French to our language program. A survey has been sent out to families to measure the interest. The principal has received questions from families related to high school credits.

Mrs. Mayfield asked if we have a certified teacher yet. We are still looking into that but are looking at a possible candidate that speaks both spanish and french.

3. **Safety** - we had our TEA audit and other than door numbering and doors with work orders in place, it was a successful event.

4. **Budget** - No news on Budget. We are working on making sure we have all of our supplies ordered for the end of the year. Working on Field Trip approval for our Baseball in School trip for students that have earned enough HERO points to

purchase a spot. Two CTE field trips after Spring Break. Students met criteria to attend. Engineering and industry related trips with 30 and 40 students respectively. Most students are in the 8th grade.

5. **Staffing** - we need a Teaching Assistant but may have a candidate. All other positions are filled and we anticipate teachers returning next year barring promotions or life changes.

6. **Professional Development** - was most recently held on February 13th. The focus was staying the course and keeping our high quality of instruction through the end of the year.

7. **Campus Improvement Plan** - we have two large portions that we have met our MOY goals. Our goal is for at least 80% of our teachers were proficient by MOY and we met that goal. For our IRT evaluations, we have far exceeded our Proficient I goal and have been rated Proficient II.

8. **Events** - Upcoming Events: Gator Gras is this Friday. Visitors are welcome to attend in the field. The band will be playing while the parade of floats. The art car will be ready and part of the parade.
The dance on 2/28 was a big success. The PTO did a great job hosting that.
Staar is happening in April. Tutorials will be taking place so that we are ready for the exam. Algebra tutorials take place every morning.
