

How does it work in a middle school?

- **270 minutes** is accrued through I&E and a pull-out from regular education class

- We are working with 3 rotations through an A-D cycle (12 days)
- Students would attend 3 I&E sessions = 120 minutes
- Students would attend PEN in place of a gen ed class 3 times = 150 minutes

- During the 12 day cycle (3x through A-D rotation):

- Students are pulled one time from ELA, one time from Science, and one time from Social Studies
- They ARE NOT pulled from math or world language, or their 2nd block of ELA
- In 12 days, they will miss Science once, Social Studies once, and 1 ELA period
- Total of only 15 classes per subject missed in a school year
