

Solar power and Wind power

Did you know that there is a lot of people in the world that have solar powers well you are going to learn about it today. After learning about different sources, solar power is the best option. It is the best option because the sun is always going to be on Earth and it never goes away. Unlike wind power it is sometime going to go. This energy

source is the best because the sun is always going to be here. (3) Electricity converted from any body for the Earth and never goes away. To convert enough from the sun into electricity need to be here. This totally supports my opinion because that it is not be able to be useful. My main thesis which is. In conclusion, solar power is a better choice than wind power because wind power is not here all the time, so there is also bad thing then have happen where birds and animals had died. Solar power is the best option because animals and other thing would not get hurt and people should use this because then bad thing will not happen.
