Construction Update #13

March 10, 2026

Rebuild & Enlarge Construction Timeline: April 2025-December 2026

The outside of the building continues to rapidly change as windows are installed and the exterior building materials are layered on the outside of the building. The exterior insulation will soon be covered with architectural panels made of metal and fiber cement. The roof continues to be installed which helps to keep the inside of the building warm and dry.

The new covered play area overhang is now clearly visible and shows off the beautiful wood beams and wood deck that will keep you sheltered during rainy days on the playground.
