Dear Ewing School Community,

I want to provide a brief update regarding roof repairs across our district, including Antheil Elementary, Ewing High School, and Fisher Middle School.

Testing and environmental monitoring at all affected buildings have confirmed that the safety of our students and staff has not been and is not at risk as a result of the roofing leaks. At Antheil Elementary, the warranty contractor has accessed the roof and will begin repairs now that weather conditions allow.

At EHS and FMS, the roofs are older and no longer under warranty. The district is working with its architect and roofing consultant to address these repairs through a phased plan, starting with the most severe areas and progressing through the remaining work over time. This approach allows us to manage resources responsibly while maintaining a safe and healthy learning environment.

Environmental monitoring is continuing as a precautionary measure, and the results from our independent consultant will be shared with the school community once available. To date, the consultant has assured us that the results support that all buildings remain safe for students and staff.

We understand that construction and repair work can raise questions and concerns, and we want to assure families that student and staff safety remains our top priority. We appreciate your continued understanding and partnership, and we will provide updates as more information becomes available.

Thank you for your support and for being a partner in maintaining a safe and positive learning environment for all students.

Respectfully,

Dr. David Gentile
Superintendent
